QUESTION 1

Match each type of malware to its definition.

To answer, drag the appropriate malware type from the column on the left to the definition on the right. Each malware type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Malware type	Answer Area	
Virus	tracks a user's computer usage	
Spyware	sends copies of itself to other machines	
Worm	spreads when an executable is initiated by a user	

Correct Answer:

Malware type	Answer Area	
	tracks a user's computer usage	Spyware
	sends copies of itself to other machines	Worm
	spreads when an executable is initiated by a user	Virus

Correct Answer:

https://www.groovypost.com/howto/join-a-windows-10-client-domain/

QUESTION 4

This question requires that you evaluate the underlined text to determine if it is correct.

You manage Windows 8.1 desktop and laptop computers in your university\\'s computer lab.

The university\\'s IT team recently implemented an active directory environment.

You need to join the desktop and laptop computers to a new Active Directory domain.

You should use the "Network and Internet" Control Panel applet to achieve this goal.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed

B. User Accounts

C. Administrative Tools

D. System

Correct Answer: D

Join a domain, workgroup, or homegroup

1.

 Open System by swiping in from the right edge of the screen, tapping Search (or if you\'re using a mouse, pointing to the upper-right corner of the screen, moving the mouse pointer down, and then clicking Search), entering System in the search box, and tapping or clicking System.

2.

 Under Computer name, domain, and workgroup settings, click Change settings. You might be asked for an admin password or to confirm your choice.

3.

 Click Network ID and follow the steps on your screen.

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

Microsoft Azure storage solutions replicates "four" copies of your data within a single region.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed

B. two

C. three

D. six

Correct Answer: C

Geo-redundant storage (GRS). Geo-redundant storage is enabled for your storage account by default when you create it. GRS maintains six copies of your data. With GRS, your data is replicated three times within the primary region, and is also replicated three times in a secondary region hundreds of miles away from the primary region, providing the highest level of durability.
