### QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

You are setting up Microsoft Office 365 for a local business that already has its own domain name. You add the domain in the Microsoft Online Portal.

You need to verify the domain. You do this by selecting Text code to my mobile phone, and then entering the code upon receipt.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. adding a DNS record at your DNS hosting provider
- B. running the Office 365 health, readiness, and connectivity check tool
- C. No change is needed.
- D. selecting Call my office phone, and then entering the code upon receipt

Correct Answer: A

---

### QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct. You are an IT intern assigned to implement Microsoft Office 365 and Microsoft Intune.

You have not created any Intune policies. You want to control endpoint protection, software updates, and a policy check schedule for a group of devices.

You must deploy a mobile device security policy template.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. Windows Firewall Settings
- C. Microsoft Intune Agent Settings
- D. Microsoft Intune Center Settings

Correct Answer: A

Microsoft Intune Policies are groups of settings that control features on mobile devices and computers. You create policies using templates that contain recommended or customized settings, and then deploy them to device or user groups.

### QUESTION 3

You are the Microsoft Lync Online administrator for your company. A customer has reported an issue when signing in to the company's Lync Online Service. When the customer attempts to sign in, the following error message is returned:

"The server is temporarily unavailable".

The server is up, and other customers are connected to it.

What is likely causing the connection issue?

- A. The user has the incorrect Lync version
- B. The user has entered the wrong user name
- C. DNS is configured incorrectly
- D. The user does not have a Lync license

Correct Answer: D

This issue occurs for one of the following reasons:

Cause 1: You are not entitled for Lync Online.

Cause 2: You lack connectivity to the Lync Online service.

Cause 3: You are running a 64-bit Windows operating system.

Reference: "Cannot sign in because the server is temporarily unavailable" error when you try to sign in to Lync Online in Office 365 dedicated <https://support.microsoft.com/en-us/kb/2619522>

---

### QUESTION 4

You are preparing to add your domain to Microsoft Office 365.

You need to define how you will use your domain by selecting Microsoft Exchange Online, Skype for Business Online, or a combination of these.

What is the name of this step in the setup process?

- A. domain purpose
- B. domain registration
- C. DNS registration
- D. DNS zone delegation

Correct Answer: A

---

## QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

You are working as an IT technician at your university.

The university has installed Microsoft Exchange Online Protection. An administrator asks you how to manage accepted domains.

You should tell the administrator to select "compliance management" in the Exchange Admin Center.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. mail flow
- C. protection
- D. permissions

Correct Answer: B

Use the EAC to view a list of managed domains

1- In the EAC, go to Mail Flow > Accepted domains.

2. Click the Name, Accepted domain, or Domain type column heading to sort alphabetically in ascending or descending order. By default, accepted domains are sorted alphabetically by name in ascending order.
