QUESTION 1

A class named Student is contained inside a namespace named Contoso.Registration. Another class named Student is contained inside a namespace named Contoso.Contacts.

You need to use both classes within the same code file.

What are two possible ways to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

A. Add the following lines of code on the top of the code file. Imports RStudent = Contoso.Registration.Student Imports CStudent = Contoso.Contacts.Student Refer to the classes as RStudent and CStudent.

B. Refer to the classes by using their fully qualified class names, Contoso.Registration.Student and Contoso.Contacts.Student.

C. Add the following lines of code on the top of the code file. Imports Contoso.Contacts Imports Contoso.Registration Refer to the classes by using the Student class.

D. Add the following line of code on the top of the code file. Imports Contoso Refer to the classes by using the Student class wrapped within the regions named Registration and Contacts.

Correct Answer: AC

QUESTION 2

You want to substitute values in a string that is displayed on the console.

Which code fragment will display "Hello, World"?

A. Console.WriteLine("Hello, [0]", "World")

B. Console.WriteLir.e ("Hello, {0}", "World")

C. Console.WriteLine("Hello, (0)", "World")

D. Console.WriteLine("Hello, ", "World")

Correct Answer: B

QUESTION 3

You need to ensure that your console application can process each key as it is pressed. Which method should you use?

A. Console.OpenStandardlnput

B. Console.ReadKey

C. Console.Read

D. Console.ReadLine

Correct Answer: B

The Console.ReadKey method obtains the next character or function key pressed by the user.

QUESTION 4

Which class should you use to perform a search of an XML document?

A. XmlElement

B. XPathDocument

C. XmlNode

D. XmlReader

Correct Answer: C

QUESTION 5

A class named Student is contained inside a namespace named Contoso.Registration. Another class named Student is contained inside a namespace named Contoso.Contacts.

You need to use both classes within the same code file. What are two possible ways to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

A. Add the following line of code on the top of the code file, Using Contoso; Refer to the classes by using the Student class wrapped within the regions named Registration and Contacts.

B. Refer to the classes by using their fully qualified class names, Contoso.Registration.Student and Contoso.Contacts.Student.

C. Add the following lines of code on the top of the code file. Using Contoso.Contacts; Using Contoso.Registration; Refer to the classes by using the Student class.

D. Add the following lines of code on the top of the code file. Using RStudent = Contoso.Registration.Student; Using CStudent = Contoso.Contacts.Student; Refer to the classes as RStudent and CStudent.

Correct Answer: AC
