### QUESTION 1

You want to load a remote SWF via HTTP within your AIR application. You also want to expose methods that are defined within your AIR application to this SWF. Which statement is true?

- A. This is NOT possible, as the AIR application and the loaded SWF are within different sandboxes
- B. You must define a sandbox bridge within your application, which can be used within the loaded SWF
- C. You must instruct the user to lower the security settings within Flash Player
- D. This is allowed by default, as long as the local methods do not involve local filesystem access

Correct Answer: B

---

### QUESTION 2

You want to create a CSS rule that styles the Spark TextInput component. Your CSS document has the following namespace declaration:

```
@namespace s "library://ns.adobe.com/flex/spark";
```

Which correctly declares a CSS rule for the Spark TextInput component?

- A. s|TextInput {}
- B. s-TextInput {}
- C. spark|TextInput {}
- D. spark-TextInput {}

Correct Answer: A

---

### QUESTION 3

Which statement describes the access rules for a variable marked as private?

- A. Any class
- B. Any class that extends the class
- C. The class itself
- D. Other classes in the same package.

Correct Answer: C

---

### QUESTION 4

Which declaration uses the correct syntax to define a style namespace for the components in the components.view package?

- A. namespace|comp components.view.\*
- B. namespace comp "components.view.\*"
- C. @namespace comp components.view.\*
- D. @namespace comp "components.view.\*"

Correct Answer: D

---

#### QUESTION 5

Which two statements about model-driven development are true? (Choose two.)

- A. End-to-end model-driven development is not possible with Flash Builder
- B. End-to-end model-driven development requires Flash Builder, the Application Modeling plug-in and a JDBC data source available to LCDS
- C. Model-driven development of client code cannot use an existing LCDS destination
- D. Model-driven development of client code is implemented using LCDS or ColdFusion with any Flex RPC data sources
- E. Model-driven development of client code can be used to generate a database schema exactly corresponding to the structure of the model

Correct Answer: BD
