**QUESTION 1**

What describes the purpose of the Enterprise Service Bus (ESB) in an SOA?

- A. It provides separation of concerns so that each service can be managed separately.
- B. It provides a design that allows components to be changed with less impact to the consumer.
- C. It allows a service consumer to make a service request without knowing the details of the operation.
- D. It implements service functionality by integrating existing back end service functionality using routing and transformation logic.

Correct Answer: B

---

**QUESTION 2**

Which statement describes the importance of SOA governance?

- A. It provides a tool for controlling the distribution of Web services for a line of business.
- B. It eliminates the risk in migrating a business from standard integration mechanisms to SOA.
- C. It creates a clearly articulated decision framework for designing, implementing and managing SOA services.
- D. It provides a mechanism for the lines of business to provide input to IT staff for the design of services.

Correct Answer: C

---

**QUESTION 3**

Which statement is true about a business process in the context of SOA?

- A. It rarely includes any manual steps.
- B. It can span people, systems and information.
- C. It takes a relatively short amount of time to complete.
- D. All services are linked to the process through an Enterprise Service Bus (ESB).

Correct Answer: B

---

**QUESTION 4**

Which organization has the greatest need for SOA governance?

- A. One that is structured around localized business representatives for the IT team(s).

- B. One in which the departments are small, geographically centralized, and provide many goods and services.
- C. One that is relatively large, geographically dispersed, and with a centralized management and funding structure.
- D. One in which the funding, management and control of IT resources are spread among multiple stakeholders in different parts of the organization.

Correct Answer: D

---

## QUESTION 5

Which approach is considered the most effective first step in ensuring funding for the service lifecycle of shared services at the enterprise level?

- A. Chargeback mechanisms are put in place to prevent illegitimate use of services.
- B. Use a "tax" based approach based on the overall usage of IT by each line of business.
- C. Form an SOA governance organization and provide this group with the required funding.
- D. Use the "first need" approach, where each project that needs a service first funds its creation.

Correct Answer: C
