QUESTION 1

What are some best practices when configuring the Aruba Firewall (Select two)?:

- A. Use aliases when possible
- B. Write rules from least specific to most specific
- C. Take actions like blacklisting when users violate policies
- D. Create a different policy for each unique rule
- E. Create different policies for access to different servers

Correct Answer: AC

QUESTION 2

Which of the following is NOT available for configuration via startup wizard?

- A. Controller name
- B. Country Code
- C. Loopback IP
- D. VLAN IP
- E. Firewall Roles

Correct Answer: C

QUESTION 3

When a client is blacklisted, the controller will:

- A. Send a message telling the client it has been blacklisted
- B. De-authenticate the client from the network but allow it to keep transmitting data
- C. Only block the client if it hasn't yet associated with an AP
- D. Stop the client from associating with any SSID on the controller
- E. Block the client from the SSID he was connected to

Correct Answer: D

QUESTION 4

In decrypt-tunneled forwarding mode, which of the following is true?

- A. Client sets up an IPSEC tunnel with the controller
- B. The AP decrypts and then the 802.11 frame is sent in a GRE tunnel to the controller
- C. The AP decrypts the 802.11 frame and bridges it on the wire
- D. The AP decrypts the 802.11 frame, encrypts it as an Ethernet frame and sends it to the Controller
- E. Clients decrypted traffic is sent down the GRE tunnel

Correct Answer: B

QUESTION 5

When looking at clients in the `Monitoring Clients` section of the Controller, which of the following information is NOT visible?

- A. Role
- B. MAC address
- C. Output power of client radio
- D. Method of authentication
