**QUESTION 1**

In your organization, a cobbler leads a Jira project with two issue types:

Shoe Order Repair

The cobbler has given you the following requirements:

1.  
All screens should use the Summary, Description, Due Date, and Components fields.
2.  
Both issue types need to use a new custom field called Shoe Type on all screens.
3.  
The Priority field should appear on all screens for Repair issues.
4.  
Users should not be able to set the Priority for Shoe Orders during creation, but the Priority field still needs to be editable and viewable after creation.

Identify the minimum number of screens and screen schemes that will meet the requirements.

- A. two screens and one screen scheme
- B. one screen and one screen scheme
- C. six screens and one screen scheme
- D. six screens and two screen schemes
- E. three screens and one screen scheme
- F. two screens and two screen schemes

Correct Answer: A

---

**QUESTION 2**

A project manager wants to stay aware of the support requests that are being raised in his project.

He wants to know if:

the team is able to handle the number of issues that are being raised in the project

there are team members who work on more than 2 issues at any given time there are sets of issues that need significantly more time to resolve when compared to others over time Which three gadgets will show him the information

he needs? (Choose three.)

- A. Activity Stream
- B. Created vs. Resolved Chart
- C. Two Dimensional Filter Statistics
- D. Resolution Time
- E. Labels

Correct Answer: ACE

---

### QUESTION 3

You are tidying up a Jira project and find that the following two issue types are being used.

Task Assignment

They seem very similar. If both are not needed, you could convert all existing Assignment issues in the project into Task issues and remove the Assignment issue type from the project.

Which project configurations would you check to see if it is necessary to keep the two as separate issue types instead? (Choose three.)

- A. Issue Security Levels
- B. Field Configurations
- C. Components
- D. Permissions
- E. Workflows
- F. Field Contexts

Correct Answer: ABF

---

### QUESTION 4

Some of your project owners would like to make their projects publicly accessible over the Internet. These projects will not require login.

You could support this by allowing read-only anonymous access to the projects.

Which two additional factors should you take into consideration when setting this up? (Choose two.)

- A. Anonymous users could see other users\' names.
- B. Anonymous users could export all issues from Jira.
- C. Licensed users might accidentally comment anonymously rather than logging in first.
- D. Internet search engines could index data.
- E. Anonymous users could find a full list of all your projects.
- F. Spam bots could add comments.

Correct Answer: BD

---

## QUESTION 5

A project lead wants to conduct historical trend analysis, but she is worried that older issues are being updated in a way that inhibits their comparison. She wants to take a snapshot of the data in her project at regular intervals so she can compare different periods.

Which tool will help meet this need?

- A. Backup Jira data
- B. Project Export
- C. JQL Results Snapshot
- D. Issue Filter Export to CSV

Correct Answer: D
