## QUESTION 1

Critical production bugs in a Jira Software project are hidden with an issue security scheme that has a single security level.

Only project administrators are listed in the security level and granted the Set Issue Security permission.

A new requirement states that a few other Jira Core users, who have Browse Projects permission, should be able to see the hidden issues. These users will vary per issue and be selected from across various groups.

What needs to be added to the security level?

- A. Application access
- B. User custom field value
- C. Group custom field value
- D. Project role
- E. Single Users
- F. Group
