Correct Answer: DE

QUESTION 4

When working with repository-side web scripts and updating aspect-provided properties on a given node, which method must be called to save the values against the node?

- A. mynode.updateAll()
- B. mynode.save()
- C. mynode.properties.save()
- D. mynode.aspects.save()

Correct Answer: B

QUESTION 5

When designing a content model in Alfresco Content Services you realize that the content model needs to refer to definitions that reside in another existing content model. How is the reference established?

- A. Alfresco will automatically be aware of the existing definitions.
- B. We need to Import the namespace of the content model within which those definitions are created.
- C. The repository does not allow a content model to reference definitions that reside on another content model.
- D. We need to merge the two content models into a single content model.

Correct Answer: C
