QUESTION 1

A customer wants to simplify and automate publishing press pages and defines the following flows:

What should the Architect recommend?

A. Create a custom workflow

B. Advise the customer to use Launches

C. Implement a Sling event listener that triggers on page creation

D. Configure MSM with the "Activate on Blueprint activation" option

Correct Answer: B

QUESTION 2

A client using AEM 6.5 on-premise is experiencing an unsustainable repository growth of 100Gb a day. After investigation, an Architect finds out that the DAM is causing this issue. Each image uploaded to the DAM triggers the creation of approximately 100 renditions, necessary by business to consume in different channels and systems. The client also complains about stale content reported by site visitors happening randomly in pages where article-related components are present.

How should the Architect address these issues?

A. Leverage AEM Adaptive Image Servlet, cache image variations in Dispatcher, and reimplement article-related components to use AJAX to load the content

B. Split WCM and DAM in separate instances, set up Connected Assets, and re-implement article-related components to use AJAX to load the content

C. Leverage AEM Adaptive Image Servlet cache image variations in Dispatcher, and implement a cache TTL in Dispatcher

D. Split WCM and DAM in separate instances, set up Connected Assets, and implement a workflow to purge all pages affected by an article change in Dispatcher

Correct Answer: B

QUESTION 3

A client\'s site does not show the latest page content for some site visitors. The client has two data centers with each configured with a Dispatcher connected to two Publish machines. The site load issue only occurs intermittently for visitors from one of the data centers.

Which step should the Architect take to resolve the issue?

A. Disable caching on all impacted data centers Dispatchers to force the Publish machines to serve the page content

B. Check the Publish instance(s) attached to the Dispatcher associated to the impacted data center

C. Check the SSL certificate on the impacted data center\'s load balance.

D. Review the log files on the Author instances to determine if there are any template errors

Correct Answer: C

QUESTION 4

A news agency editor wants to publish news articles to an intermediate Publish (preview) instance for internal review before publishing the article to production Publish instance. Which two steps should the Architect recommend? (Choose two.)

A. Create a closed user group (CUG) for editors

B. Create a reverse replication agent on preview server

C. Create a separate live copy to preview content

D. Set up a new replication agent for preview server

E. Create a custom publish workflow

Correct Answer: BC

QUESTION 5

A customer has an international presence and a strong brand image. The customer considers the exceptional quality images used for both print and on the website to be essential for its business, The customer uses AEM 6.5 managed services with a configuration of 2 dispatchers, 2 publishers, and 1 author.

The original images can weigh up to 500Mb with videos weighing even more. Renditions are generated after files are uploaded to AEM DAM by the Design team so the Authoring team can use them on the website.

The teams report issues with platform stability and slowness. Visitors report that images look pixelated on some screens and pages are very slow to load.

Which two actions should the Architect take to resolve these issues? (Choose two.)

A. Train the design team to upload smaller assets and save the originals elsewhere

B. Allocate more memory to ImageMagick and FFmpeg

C. Optimize renditions for the different viewports used by the visitors

D. Split AEM Assets and Sites in two different stacks and use Connected Assets

E. Add more dispatchers and publishers to the AEM configuration

Correct Answer: AD
