QUESTION 1

How do you set the custom block MyCompany\MyModule\Block\A as a child for the block named product.info using layout XML?

A

```
<referenceContainer name="product.info">
    <block class="MyCompany\MyModule\Block\A" name="custom.block" />
</referenceContainer>
```

B

```
<referenceBlock name="product.info">
    <block class="MyCompany\MyModule\Block\A" name="custom.block" />
</referenceBlock>
```

C

```
<block class="MyCompany\MyModule\Block\A" name="custom.block" >
    <arguments>
        <argument name="parent" xsi:type="string">product.info</argument >
    </arguments>
</block>
```

D

```
<block class="MyCompany\MyModule\Block\A" name="custom.block" parent="product.info" />
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: B

QUESTION 2

You are working on a custom web API endpoint and have configured it in etc/webapi.xml. This config is cached as part of the config_webservice cache type.

Keeping performance in mind, how do you refresh the cached version of this config using Magento CLI?

A. cache:clean config_webservice

B. cache:refresh config_webservice

C. cache:flush

D. cache:purge

Correct Answer: A

QUESTION 3

You are working on a Magento store which will be selling in two countries. Each country has its own set of payment methods.

How do you organize the project to support this requirement?

- A. Create one website, two payment scopes
- B. Create one website, one store view
- C. Create one website, two store views
- D. Create two websites, two store views

Correct Answer: A

QUESTION 4

You are creating a module that will be sold on the Magento Marketplace. You wish for this module to be easily extensible, and decide to add the capability for other developers to utilize extension attributes. What is the minimum update necessary to enable this capability?

- A. Add the `getExtensionAttributes()` method and implement `ExtensionAttributesInterface` in each model.
- B. Create an `ExtensionAttributeInterface` for each model.
- C. Ensure each model extends `Magento\Framework\Model\AbstractExtensibleModel`.
- D. Configure your models in `etc/extension_attributes.xml`

Correct Answer: A

QUESTION 5

In a code review of a merchant's site you have discovered that there are multiple observers for the `checkout_submit_all_after` event. After closer inspection, you notice one of these observers is relying on the others being executed before it is called.

What risk does this pose, and how can it be mitigated?

- A. There is no risk posed as long as each event observer specifies a correct `sortOrder`. Nothing needs to be changed.
- B. Event observers are fired in alphabetical order of the observer name. There is no risk here.
- C. Magento only supports one observer per event. These observers will need to be combined into a single point of customization.
- D. Order of listener execution cannot be guaranteed, resulting in a fragile implementation. This code should be re-

worked using plugins

Correct Answer: D
