QUESTION 1

You fixed an issue in a third-party extension using a patch named m2-hotfixes/extension- fix.patch Before committing the patch to the repository you want to test itlocally.

How do you test a patch in a clean working copy?

A. Commit the patch because the pre-commit hook will abort the commit it any hotfix causes an issue

B. Run the command git apply m2-hotfixea/extension-fix.patch

C. Run the command bin/magento setup:hotfix:apply --patch=m2-hctfixes/extension- fix.patch

D. Configure a deploy hook in .magento.app.yaml that executes vendor/bin/ece-tools hotfix:apply --dry-run

Correct Answer: B

QUESTION 2

You are a technical admin on a Magento Commerce Cloud account A coworker needs to submit a support request with Magento Support.

What is needed to enable support ticket access"?

A. Ask the account owner to add the user to shared access

B. Ask the launch manager to create a support account for this user

C. Change the environment access role to contributor for this user

D. Update the project role of this user to administrator

Correct Answer: D

QUESTION 3

You are reviewing a third party extension for Magento Commerce Cloud compatibility.

You discover the module writes to a custom directory called internal/ within the Magento base directory.

The directory has to be shared by all web servers.

What do you do so the module can be used on Magento Commerce Cloud?

A. Create a symlink from /top/internal to the internal/ folder

B. Declare a shared mount for the internal/directory in .magento. app.yaml

C. Request the vendor make the directory configurable in the Magento admin

D. Add a patch for extension so it uses the subdirectory var/internal/ instead

Correct Answer: B

QUESTION 4

You want to exclude some themes from static assets generation only for integration environments You are trying to choose where to set the scd_exclude_themes variable in the . magento.env.yaml tile or in the Project WeD Ul.

What prevents the usage of the . magento. env.yaml file?

A. Child environments inherit the variable when you use the . magento. env. yaml file

B. The code from integration would be merged into the Staging and Production branches

C. The .magento.env.yama file can contain only deployment configuration options, which are only available it static assets generation runs on the deploy phase

D. Only variables which are set using the Project Web Ul has the option visible during build

Correct Answer: B

QUESTION 5

You built a custom command that runs during the build phase, but it is not generating files property Magento Support provided a patch that you added to theproject.

What must you do to ensure this command runs after the patch has been applied?

A. Ensure your custom command runs after the ece-tools build hooks

B. Move your custom command to run in the deploy phase

C. Apply the patch manually in your custom command, because patches are always applied at the end of deployment

D. Nothing because patches are already applied when any hook runs

Correct Answer: A
