QUESTION 1

After making changes to custom commands in the deploy and build phases you deploy to Staging. The deployment takes much longer than expected, and Staging is in maintenance mode for most of this time.

What do you do to reduce site downtime?

- A. Set the SKIP_MAINTENANCE_SCD variable to true in the .magento.env.yaml file
- B. Add a custom command to the post_deploy phase to activate deferred deployment
- C. Move custom commands from the deploy phase to the build phase.
- D. Update the SCD_MATRIX variable to include only necessary custom commands

Correct Answer: C

QUESTION 2

You are updating a Magento Commerce Cloud project from version 2.2.5 to 2.3.0 with the command.

```
Composer require magento/product-enterprise-edition:2,3,0
```

However, composer is unable to complete the task because the installed version of magento/magento-cloud-metapackage is not compatible.

How do you upgrade magento to the desired version?

- A. Create a new project based on magento/product-enterprise-edition: 2, 3, 0, then add eco-tools, custommodules and themes again with composer and migrate the data
- B. Run composer require magento/magento-cloud-metapackage:2,3,0
- C. Revert the composer.json to the last commit before the update and run the command again with the --with-dependencies argument
- D. Remove magento/product-enterprise-edition from the root composer.json requirements and run composer update

Correct Answer: B

QUESTION 3

You are working with a new developer who needs to be able to deploy code and view logs on MagentoCommerce Cloud.

What must you do to give them access?

- A. In the .magento.app.yaml file, add their email under Users. They need to enter their SSH public key.
- B. Add their SSH public key to a file named .ssh/authorized_keys and deploy the change.

- C. In the Cloud Project Web UI, click Add User to add their email. They need to enter their SSH public key.
- D. Add a Magento admin user for them and paste the SSH public key into their user's SSH Key field, which is available only on Magento Commerce Cloud

Correct Answer: C

QUESTION 4

After deploying to Staging for the first time with the Fastly module installed, you notice that Fastly is not caching pages. Page caching works properly in a local development environment.

What two steps are required to make Fastly cache pages? Choose 2 answers

- A. Activate the module by setting Caching Application to Fastly CDN.
- B. Connect the Fastly shield using the Shield setting in the Magento admin.
- C. Enable the Fastly connection by running `magento-Cloud fastly:setup`.
- D. Populate VCL in Fastly by clicking on Upload VCL to Fastly in the Magento admin.

Correct Answer: AD

QUESTION 5

Magento Support advises you to upgrade to the latest release of ece-tools matching the project's Magento Commerce version 2.3.1.

How do you do that?

- A. Require the exact version with `composer require magento/ece-tools:2.3.1-px` where X is the latest release number
- B. Clone the repository `github.com/magento/ece-tools` and copy the `ate/folder` to `vendor/magento/ecetools/src`
- C. Run the command `composer update magento/ece-tools`
- D. Run the Command `ece-tools self-upgrade`

Correct Answer: A
