**QUESTION 1**

After deploying to Staging for the first time with the Fastly module installed, you notice that Fastly is not caching pages. Page caching works properly in a local development environment.

What two steps are required to make Fastly cache pages? Choose 2 answers

- A. Activate the module by setting Caching Application to Fastly CDN.
- B. Connect the Fastly shield using the Shield setting in the Magento admin.
- C. Enable the Fastly connection by running `magento-Cloud fastly:setup`.
- D. Populate VCL in Fastly by clicking on Upload VCL to Fastly in the Magento admin.

Correct Answer: AD

---

**QUESTION 2**

A client has an in-house design team which manages content on their Magento Commerce Cloud project

This content is rapidly changing and they would like the ability to maintain their own stylesheets in a structured way without affecting site uptime.

How do you achieve this on the integration branch?

- A. Modify the writeable directories on the Integration Environment by using the `.magento.env.yaml` file
- B. Add a custom command to the build hook in the `.magento.app.yaml` file to retrieve the stylesheets from a client hosted location
- C. The Magento Infrastructure Team needs to create a writeable directory in which the stylesheets can be uploaded.
- D. Use the `.magento.app.yaml` file to create a mount in the `pub` directory

Correct Answer: B

---

**QUESTION 3**

You need to test a data-related issue occurring on your Production environment. You replicate the data to your staging environment utilizing the Synchronization tool. When you access your staging environment you are redirected to your Production environment. Your project is on the Starter plan.

How do you prevent the redirect?

- A. Use the `magento-cloud route:add` command to create a route to the Staging URL
- B. Modify the `yA3EXT0_CLOUD_ROUTES` environment variable on your staging environment
- C. Enter the proper URL in the Routes for Staging under the Environment Settings in the Project Web UI

D. Configure UPDATE\_URLS to true in the .magento.env.yaml file

Correct Answer: D

---

#### QUESTION 4

You have created a new Integration branch and did not receive the administrator email with the password reset link. What is prohibiting the email from sending?

- A. You have not enabled the Magento Email module with bin/magento module: enable
- B. The Outgoing Emails setting is disabled under Environment Settings in the Project Web UI
- C. Email is always disabled on all integration branches
- D. You have not configured SendGrid for this environment

Correct Answer: C

---

#### QUESTION 5

Magento Support advises you to upgrade to the latest release of ece-tools matching the project's Magento Commerce version 2.3.1.

How do you do that?

- A. Require the exact version with composer require magento/ece-tools:2.3.1-px where X is the latest release number
- B. Clone the repository github.com/magento/ece-tools and copy the src folder to vendor/magento/ece-tools/src
- C. Run the command composer update magento/ece-tools
- D. Run the Command ece-tools self-upgrade

Correct Answer: A
