QUESTION 1

What devices may a Runtime Resource receive INSTRUCTIONAL communications from? (Choose four.)

- A. Active Directory Domain Controllers
- B. Blue Prism Interactive Clients
- C. Blue Prism Application Server(s)
- D. Other Blue Prism Runtime Resources
- E. Third party systems accessing Blue Prism web services
- F. Blue Prism Credential Manager

Correct Answer: BCDE

QUESTION 2

When process automations are designed appropriately, which connections between Blue Prism devices can support high-latency?

- A. Interactive Clients to Runtime Resources
- B. Application Server to Runtime Resources
- C. Application Server to Database Server
- D. Application Server to Interactive Client
- E. No components can be supported over a high-latency connection

Correct Answer: A

QUESTION 3

What are the benefits of enabling direct network access from a Runtime to an end user application, as opposed to connecting via a component such as Citrix or RDSH? (Choose two.)

- A. Network latency is circumvented
- B. There are more options for interacting directly with the applications which accelerates time required to build automations
- C. Automations built using direct object level instrumentation are likely to be more robust
- D. It is then possible to record an automation directly using the spying tools
- E. This enables the use of Surface Automation, which is faster to develop

Correct Answer: BC

QUESTION 4

By default, what port does a Runtime Resource listen on?

- A. 8181 – but it is configurable
- B. 8199 – this is fixed and cannot be changed
- C. 443
- D. There is no default

Correct Answer: A

QUESTION 5

What restrictions should be considered if using XenDesktop for delivery of the Runtime Resources? (Choose two.)

- A. Login Agent must be used to initiate the login to the device vs the Citrix Client.
- B. Only version 5 of Blue Prism is supported with XenDesktop.
- C. Login Agent is only supported from version 7.6 of XenDesktop, due to restrictions on 3rd party credential provider support prior to this.
- D. XenDesktop is not a supported platform for the Runtime Resource.
- E. Surface Automation will need to be used for all automations.

Correct Answer: AC
