QUESTION 1

Which of the following should be taken into account, when designing the security model for a Blue Prism environment? (Choose five.)

- A. Integration with Active Directory
- B. The location of the credential store keys
- C. Integration with an external LDAP service
- D. The encryption method for the credential store
- E. The encryption method for the operational communications between database server and runtimes
- F. The separation of duties between roles and environments
- G. Remote access to the Blue Prism components

Correct Answer: ABEFG

QUESTION 2

Which of the following are common reasons to deploy multiple Application Servers for a single environment? (Choose two.)

- A. Redundancy – e.g. to provide a level of continuity if one Application Server fails
- B. To increase the overall security of the environment
- C. The number of connected clients and runtime resources
- D. The Application Server doubles up as a Web Server for a separate application

Correct Answer: AC

QUESTION 3

When is virtualization of a dedicated Interactive Client System most appropriate? (Choose two.)

- A. Interactive Clients should never be virtualized
- B. For Process Development – it helps to ensure the Interactive Client has the same configuration as the virtualized Runtime Resources
- C. Where the developers are geographically separate to the Blue Prism environment
- D. To ensure a high-latency connection between the Interactive Client and the Application Server
- E. Whenever runtime resources are virtualized

Correct Answer: CD

QUESTION 4

Which of the following statements is true, when considering the Virtualization of Blue Prism? (Choose two.)

- A. Type 1 hypervisors, such as VMWare Vsphere and Citrix XenServer should be used for production grade deployments of Blue Prism.
- B. Type 2 hypervisors, such as Oracle Virtualbox and Vmware Workstation may be used for production grade deployments of Blue Prism.
- C. All desktop virtualization strategies are suitable for deployment of Runtime Resources.
- D. Consideration should be given to the system resource requirements of the automated applications, on top of the Blue Prism minimum specifications.
- E. The Blue Prism minimum specifications should be sufficient for all use cases.

Correct Answer: AD

QUESTION 5

When process automations are designed appropriately, which connections between Blue Prism devices can support high-latency?

- A. Interactive Clients to Runtime Resources
- B. Application Server to Runtime Resources
- C. Application Server to Database Server
- D. Application Server to Interactive Client
- E. No components can be supported over a high-latency connection

Correct Answer: A
