100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Blue Prism  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Where can the key used by the Credential Manager be stored?

- A. The key is always stored in the database
- B. The key is always stored within the config file on the Application Server
- C. The key can either be stored in the database, in the config file on the Application Server, or in a separate securable file on the Application Server
- D. The key is hard-coded and stored securely within the Application. It is subjected to obfuscation to ensure it's protection
- E. The key can only be stored in the database or in the config file on the Application Server

Correct Answer: C

---

**QUESTION 2**

What should be considered when configuring high availability and disaster recovery scenarios for availability of Business Processes managed by Blue Prism? (Choose two.)

- A. Resource pools and Active Queues can be used to distribute work to Runtime Resources which are online
- B. The Runtime Resources are "stateful" devices, therefore any failure or maintenance event should also be taken into account in the process design and scheduling methodology
- C. Using a load balancer and 2 application servers will ensure high availability of an automated process
- D. Use the setting within a Blue Prism Process to force a process to fail over to an alternative Runtime Resource in the event of a failure.

Correct Answer: AC

---

**QUESTION 3**

What restrictions should be considered if using XenDesktop for delivery of the Runtime Resources? (Choose two.)

- A. Login Agent must be used to initiate the login to the device vs the Citrix Client.
- B. Only version 5 of Blue Prism is supported with XenDesktop.
- C. Login Agent is only supported from version 7.6 of XenDesktop, due to restrictions on 3rd party credential provider support prior to this.
- D. XenDesktop is not a supported platform for the Runtime Resource.
- E. Surface Automation will need to be used for all automations.

Correct Answer: AC

---

## QUESTION 4

Why is it important to control remote console access to the Runtime Resources?

- A. Because runtime resources are used to control the scheduling of processes
- B. Because runtime Resources will always have administrative level access to the Blue Prism database
- C. Because Runtime Resources will always have administrative level access to the Blue Prism control room
- D. Because Runtime Resources will be executing automations, where data may be visible or a transaction could be manually interfered with

Correct Answer: D

---

## QUESTION 5

What are appropriate methods for designing high availability and disaster recovery scenarios for the Blue Prism Database? (Choose three.)

- A. SQL Always on Availability Groups
- B. Windows Clustering
- C. Replication
- D. Blue Prism Active Sync
- E. Connect an application server to 2 Database Instances in parallel

Correct Answer: ABC
