QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription named Subscription1. Subscription1 contains a resource group named RG1. RG1 contains resources that were deployed by using templates.

You need to view the date and time when the resources were created in RG1.

Solution: From the RG1 blade, you click Deployments.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 2

HOTSPOT

You plan to use Azure Network Watcher to perform the following tasks:

Task1: Identify a security rule that prevents a network packet from reaching an Azure virtual machine

Task2: Validate outbound connectivity from an Azure virtual machine to an external host

Which feature should you use for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Task1:

| IP flow verify |
| Next hop |
| Packet capture |
| Security group view |
| Traffic Analytics |

Task2:

| Connection troubleshoot |
| IP flow verify |
| Next hop |
| NSG flow logs |
| Traffic Analytics |

Correct Answer:

Answer Area

Task1:
IP flow verify
Next hop
Packet capture
Security group view
Traffic Analytics

Task2:
Connection troubleshoot
IP flow verify
Next hop
NSG flow logs
Traffic Analytics

QUESTION 3

You have an Azure policy as shown in the following exhibit.

SCOPE

* Scope (Learn more about setting the scope)

```
Subscription 1
```

Exclusions

```
Subscription 1/ContosoRG1
```

BASICS

* Policy definition

```
Not allowed resource types
```

* Assignment name ⓘ

```
Not allowed resource types
```

Assignment ID

```
/subscriptions/3eb8d0b6-ce3b-4ce0-
a631-9f5321bedabb/providers/Microsoft.Authorization/policyAssignments/0e6fb866b854f54accae2a9
```

Description

Assigned by:

```
admin1@contoso.com
```

PARAMETERS

* Not allowed resource types ⓘ

```
Microsoft.Sql/servers
```

What is the effect of the policy?

A. You can create Azure SQL servers in ContosoRG1 only.

B. You are prevented from creating Azure SQL servers anywhere in Subscription 1.

C. You are prevented from creating Azure SQL Servers in ContosoRG1 only.

D. You can create Azure SQL servers in any resource group within Subscription 1.
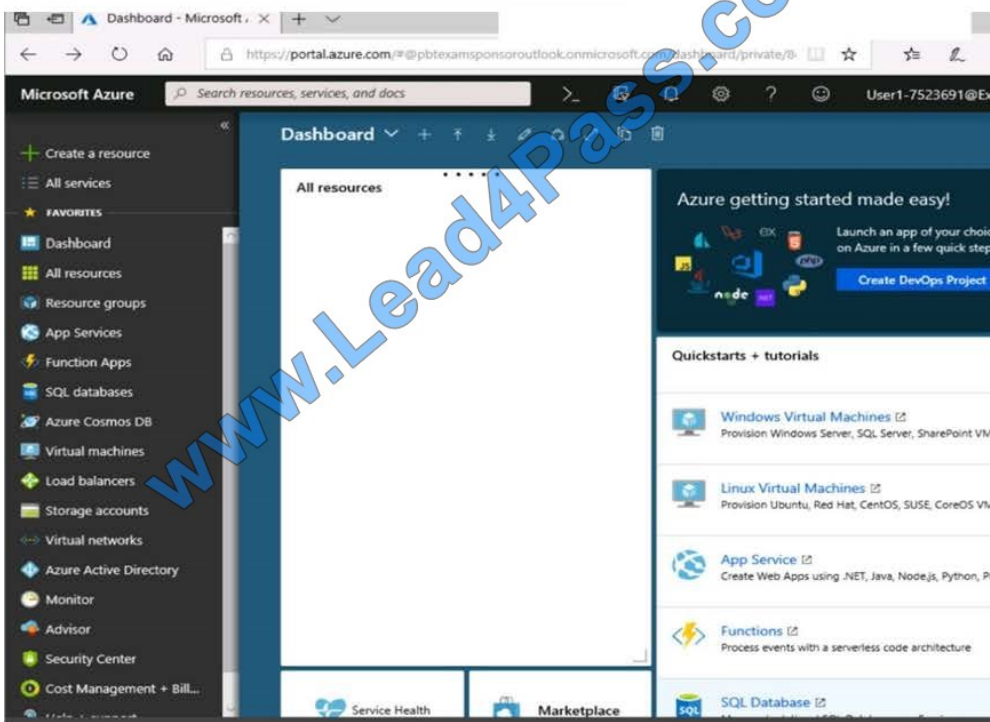

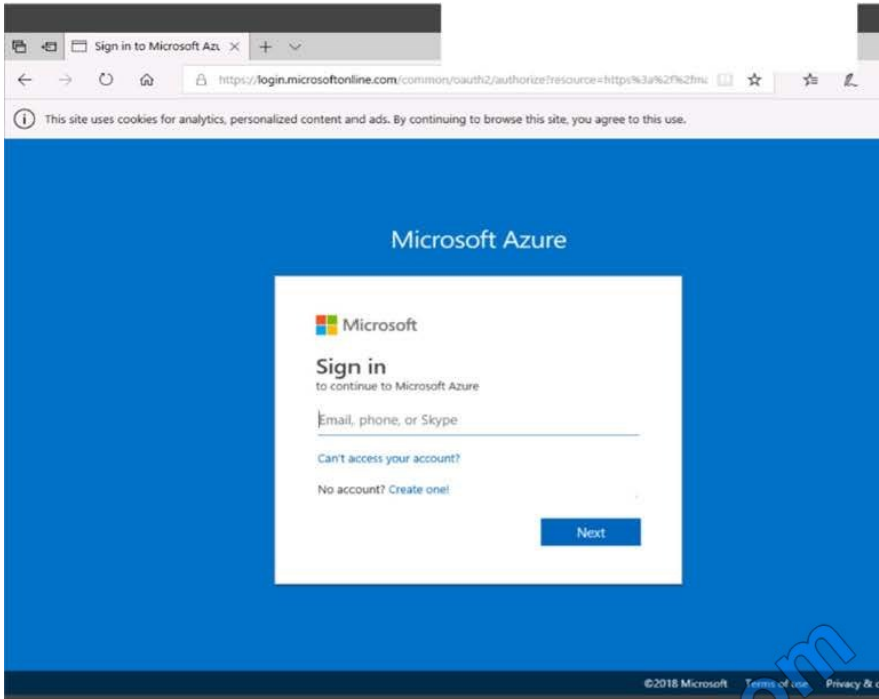

Correct Answer: A

You are prevented from creating Azure SQL servers anywhere in Subscription 1 with the exception of ContosoRG1

QUESTION 4

SIMULATION

Click to expand each objective. To connect to the Azure portal, type https://portal.azure.com in the browser address bar.

Instructions   Comments   Controls Available   Keyboard Shortcuts Available

Tasks

Click to expand each objective

– Configure servers

☐ Add the "Print and Document Services" role to server LON-SVR1, installing any required management features and enabling both Print and LPD Services.

+ Configure file and share access

When you are finished performing all the tasks, click the \'Next\' button.

Note that you cannot return to the lab once you click the \'Next\' button. Scoring occur in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn\'t matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

To start the lab

You may start the lab by clicking the Next button.

You need to allow RDP connections over TCP port 3389 to VM1 from the internet. The solution must prevent connections from the Internet over all other TCP ports.

What should you do from the Azure portal?

Correct Answer:

Step 1: Create a new network security group Step 2: Select your new network security group.
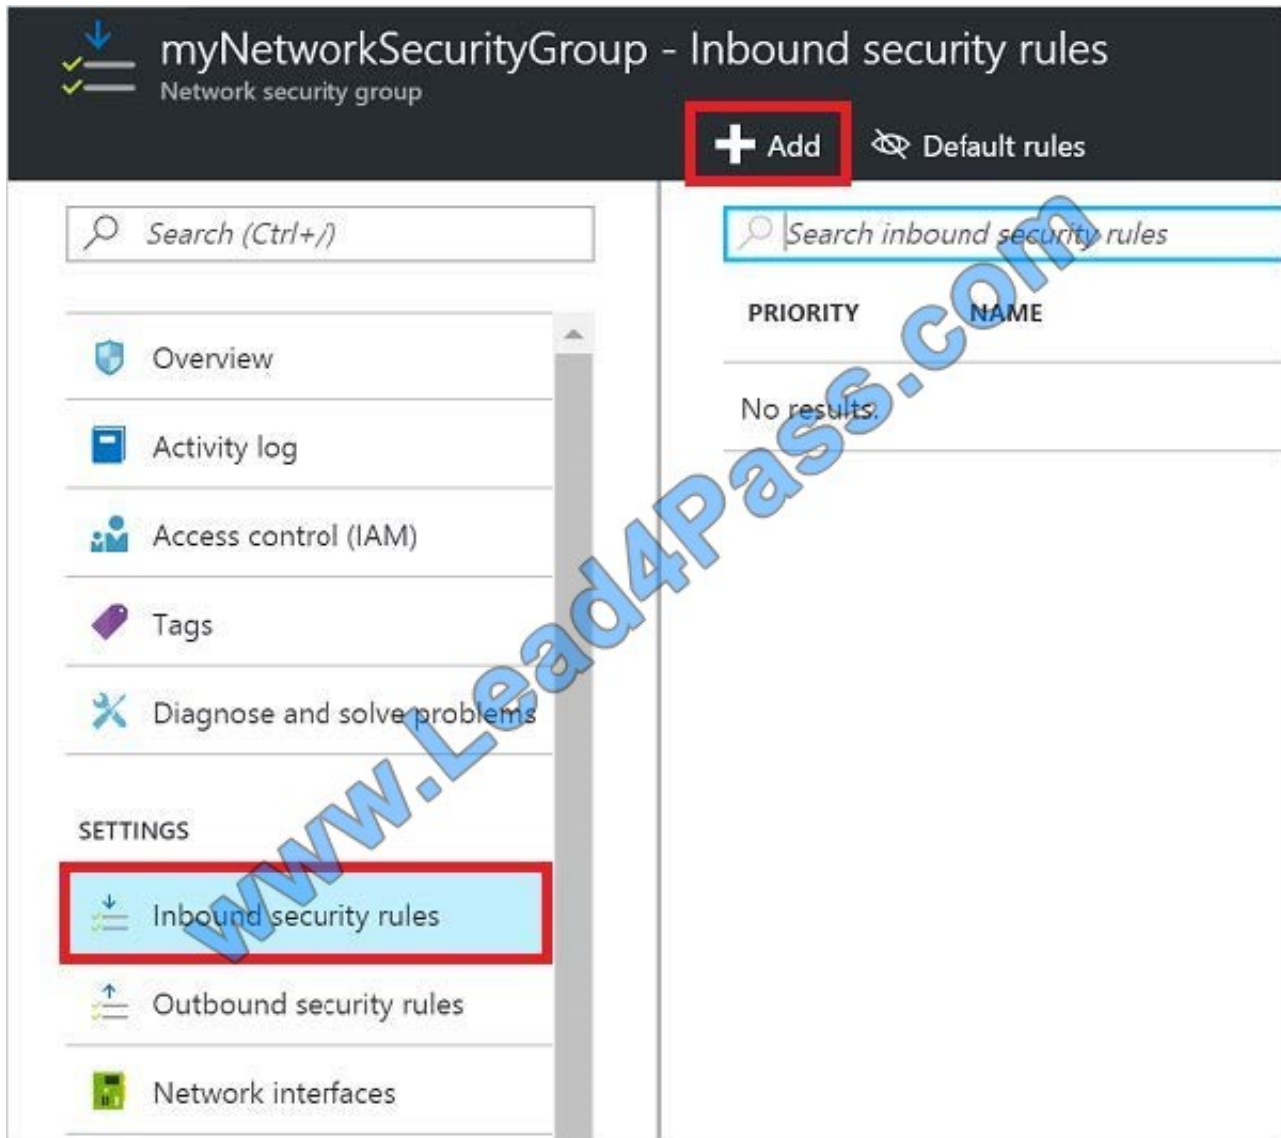

Step 3: Select Inbound security rules, . Under Add inbound security rule, enter the following

Destination: Select Network security group, and then select the security group you created previously. Destination port ranges: 3389 Protocol: Select TCP
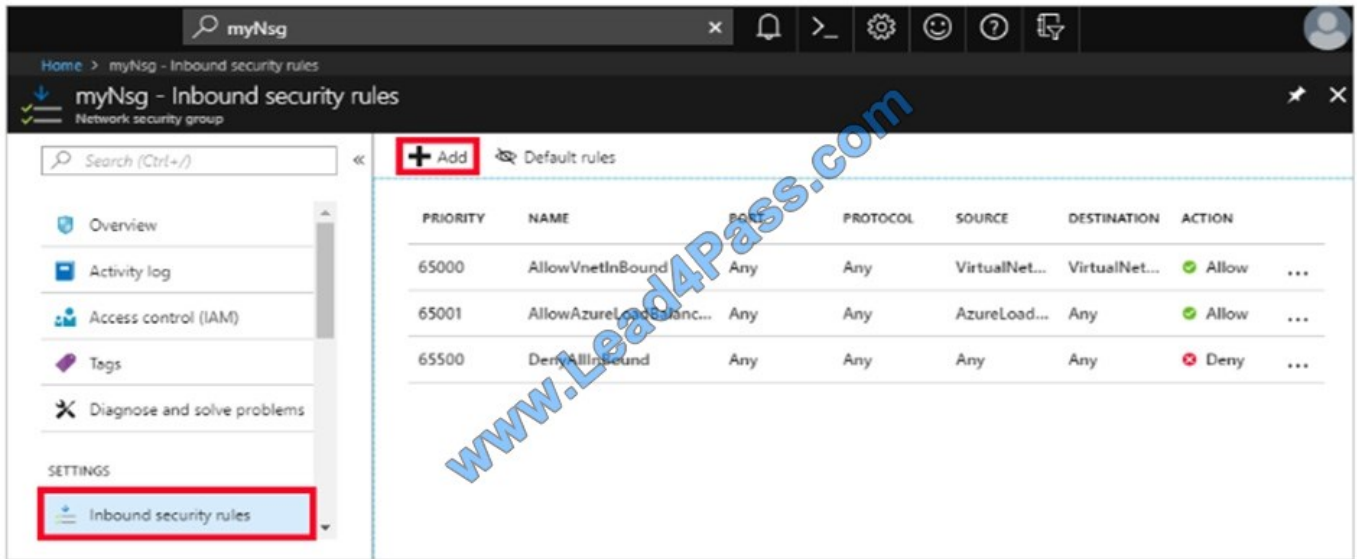

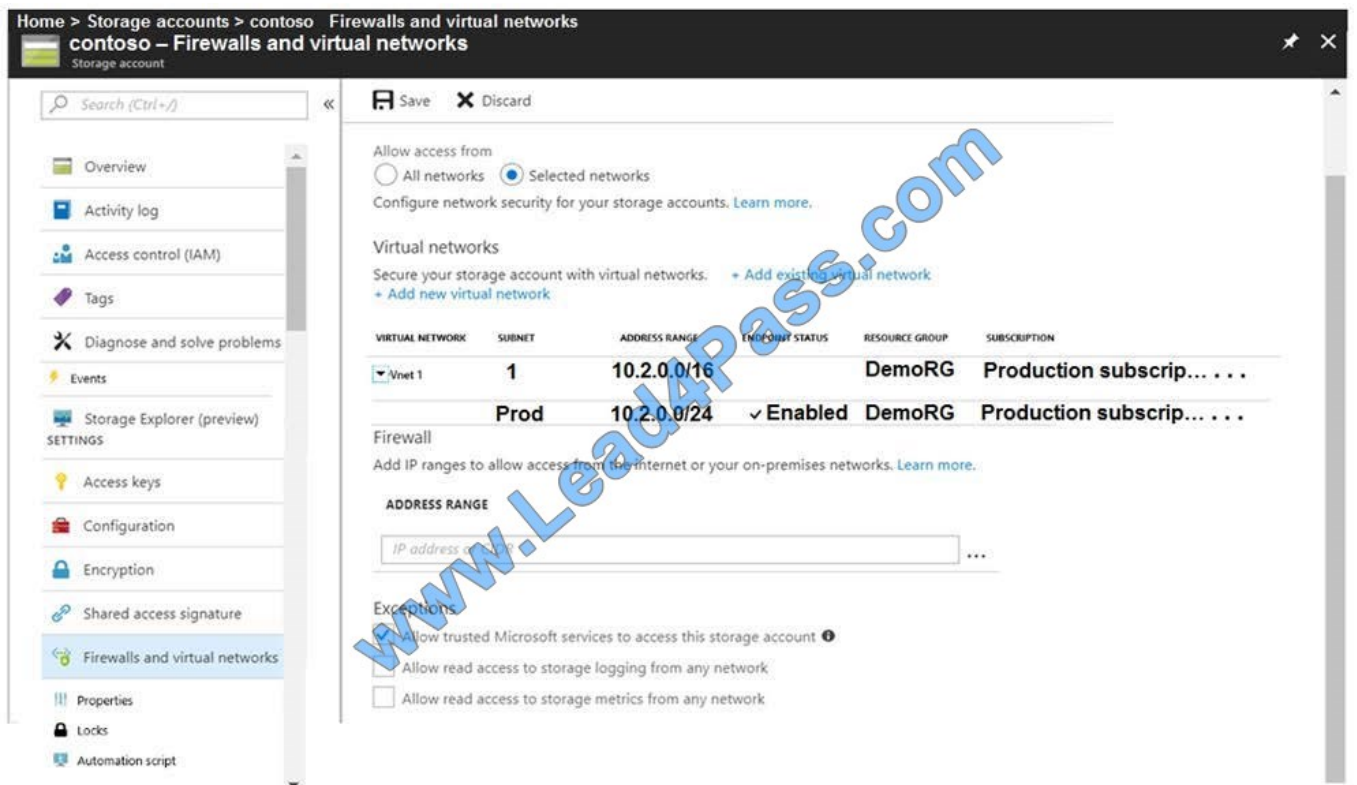

QUESTION 5

HOTSPOT

You have several Azure virtual machines on a virtual network named VNet1.

You configure an Azure Storage account as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.
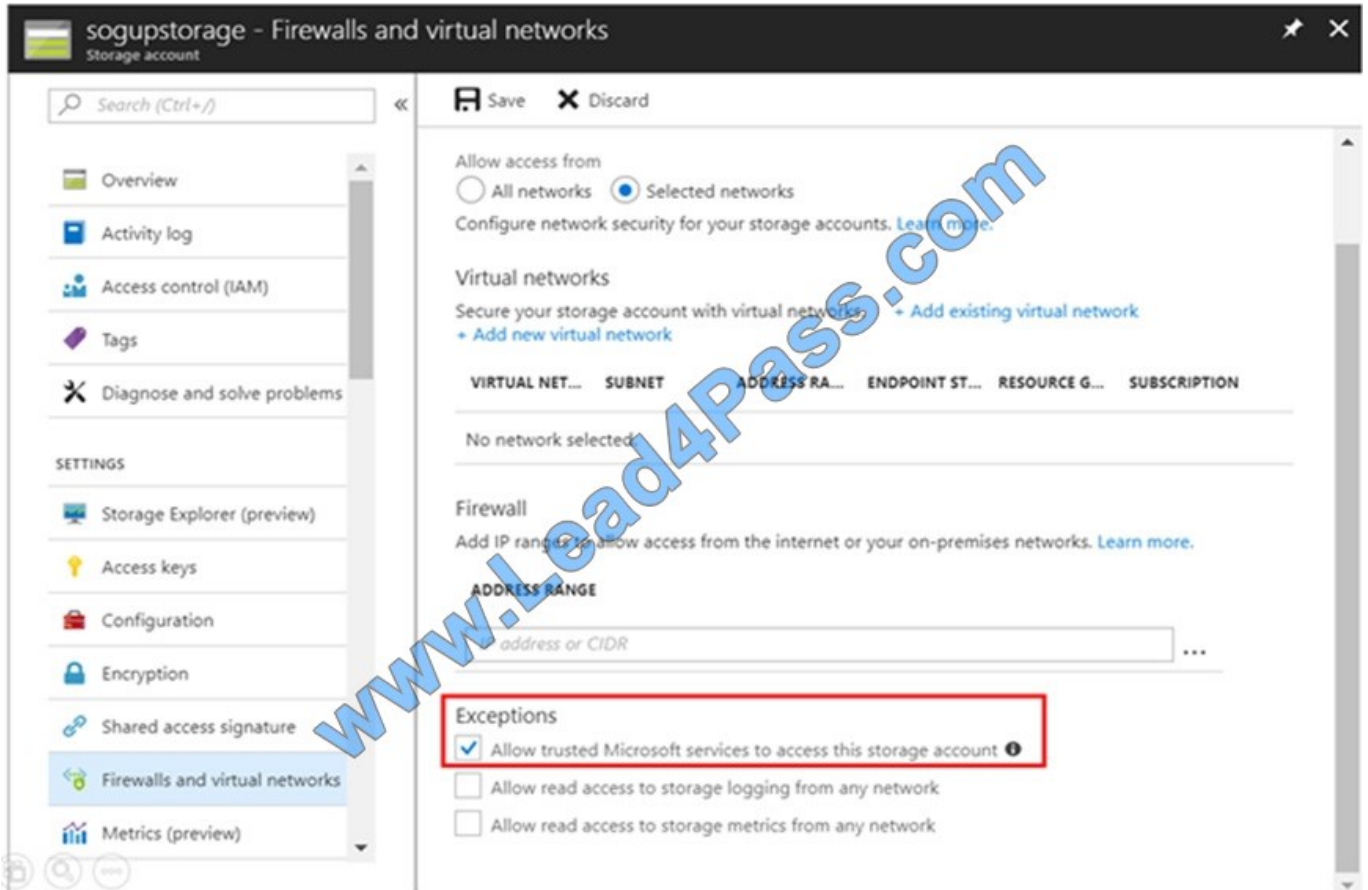

Hot Area:

Answer Area

The virtual machines on the 10.2.9.0/24 subnet will have network connectivity to the file shares in the storage account.

▼
always
during a backup
never

Azure Backup will be able to back up the umanaged hard disks of the virtual machines in the storage account.

▼
always
during a backup
never

Correct Answer:

Answer Area

The virtual machines on the 10.2.9.0/24 subnet will have network connectivity to the file shares in the storage account.

▼
always
during a backup
never

Azure Backup will be able to back up the umanaged hard disks of the virtual machines in the storage account.

▼
always
during a backup
never

Box 1: always Endpoint status is enabled. Box 2: Never After you configure firewall and virtual network settings for your storage account, select Allow trusted Microsoft services to access this storage account as an exception to enable Azure Backup service to access the network restricted storage account.
