QUESTION 1

You have an Azure subscription that contains the following storage account:

Name	Kind	Replication	Access tier	Advanced threat protection	Lock
storage1	StorageV2	Read access geo-redundant storage (RA-GRS)	Cool	On	Delete

You need to create a request to Microsoft Support to perform a live migration of storage1 to Zone Redundant Storage (ZRS) replication. How should you modify storage1 before the Live migration?

- A. Set the replication to Locally-redundant storage (LRS)
- B. Disable Advanced threat protection
- C. Remove the lock
- D. Set the access tier to Hot

Correct Answer: A

If you want to live migration from RA-GRS to ZRS, at first you have to Switch the storage tier to LRS and then only you can request a live migration.

Switching	...to LRS	...to GRS/RA-GRS	...to ZRS	...to GZRS/RA-GZRS
...from LRS	N/A	Use Azure portal, PowerShell, or CLI to change the replication setting ¹	Perform a manual migration Request a live migration	Perform a manual migration OR Switch to GRS/RA-GRS first and then request a live migration ¹
...from GRS/RA-GRS	Use Azure portal, PowerShell, or CLI to change the replication setting	N/A	Perform a manual migration OR Switch to LRS first and then request a live migration	Perform a manual migration Request a live migration

QUESTION 2

Your company has an Azure subscription.

You need to deploy a number of Azure virtual machines (VMs) using Azure Resource Manager (ARM) templates. You have been informed that the VMs will be included in a single availability set.

You are required to make sure that the ARM template you configure allows for as many VMs as possible to remain accessible in the event of fabric failure or maintenance.

Which of the following is the value that you should configure for the platformUpdateDomainCount property?

- A. 10
- B. 20
- C. 30
- D. 40

Correct Answer: B

Each availability set can be configured with up to three fault domains and twenty update domains.

<https://docs.microsoft.com/en-us/azure/virtual-machines/availability-set-overview>

QUESTION 3

HOTSPOT

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You have two external partner organizations named fabrilcam.com and litwareinc.com. FabtAam.com is configured as a connected organization.

You create an access package as shown in the Access package exhibit. (Click the Access package lab.)

You configure the external user lifecycle settings as shown in the Lifecycle exhibit. (Click the lifecycle tab)

For each of the following statements, select Yes if the statement is true Otherwise, select No

Note: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
Litwareinc.com users can be assigned to package1.	<input type="radio"/>	<input type="radio"/>
After 365 days, fabrikam.com users will be removed from Group1.	<input type="radio"/>	<input type="radio"/>
After 395 days, fabrikam.com users will be removed from the contoso.com tenant.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
Litwareinc.com users can be assigned to package1.	<input checked="" type="radio"/>	<input type="radio"/>
After 365 days, fabrikam.com users will be removed from Group1.	<input type="radio"/>	<input checked="" type="radio"/>
After 395 days, fabrikam.com users will be removed from the contoso.com tenant.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 4

You have an Azure subscription that contains 10 virtual machines.

You need to ensure that you receive an email message when any virtual machines are powered off, restarted, or deallocated.

What is the minimum number of rules and action groups that you require?

- A. three rules and three action groups
- B. one rule and one action group
- C. three rules and one action group
- D. one rule and three action groups

Correct Answer: C

An action group is a collection of notification preferences defined by the user. Azure Monitor and Service

Health alerts are configured to use a specific action group when the alert is triggered. Various alerts may use the same action group or different action groups depending on the user's requirements.

References:

<https://docs.microsoft.com/en-us/azure/monitoring-and-diagnostics/monitoring-action-groups>

QUESTION 5

You have an Azure subscription that contains the following resources:

1.
100 Azure virtual machines
2.
20 Azure SQL databases
3.
50 Azure file shares

You need to create a daily backup of all the resources by using Azure Backup.

What is the minimum number of backup policies that you must create?

- A. 1
- B. 2
- C. 3
- D. 150
- E. 170

Correct Answer: C

There is a limit of 100 VMs that can be associated to the same backup policy from portal. We recommend that for more than 100 VMs, create multiple backup policies with same schedule or different schedule.

One policy for VMS, one for SQL databases, and one for the file shares.
