QUESTION 1

HOT SPOT

You develop a news and blog content delivery app for Windows devices.

A notification must arrive on a user's device when there is a new article available for them to view.

You need to implement push notifications.

How should you complete the code segment? To answer, select the appropriate options in the answer area;

NOTE: Each connect selection is worth one point.

Hot Area:

The screenshot shows a code editor with the following code segment:

```
string notificationHubName = "contoso_hub";  
string notificationHubConnection = "connection_string";
```

Below the code, there are two dropdown menus. The first dropdown is labeled "hub" and contains the following options:

- NotificationHubClient
- NotificationHubClientSettings
- NotificationHubJob
- NotificationDetails

The second dropdown is labeled "hub" and contains the following options:

- GetInitialization
- CreateClientFromConnectionString
- OnUpdateInstallation
- OnInstallation

The code segment continues with:

```
(notificationHubConnection, notificationHubName);  
string windowsToastPayload =  
@"<toast><visual><binding template=""toastText01""><text id=""1""> +
```

Correct Answer:

The screenshot shows the same code editor as above, but with the following options selected in the hot area:

- NotificationHubJob
- NotificationHubClient
- CreateClientFromConnectionString

```
string notificationHubName = "contoso_hub";  
string notificationHubConnection = "connection_string";  
  
NotificationHubClient  
NotificationHubClientSettings  
NotificationHubJob  
NotificationDetails  
  
NotificationHubClient  
NotificationHubClientSettings  
NotificationHubJob  
NotificationDetails  
  
(notificationHubConnection, notificationHubName);  
string windowsToastPayload =  
@"<toast><visual><binding template=""ToastText01""><text id=""1""> +
```

QUESTION 2

DRAG DROP

You need to deploy a new version of the LabelMaker application.

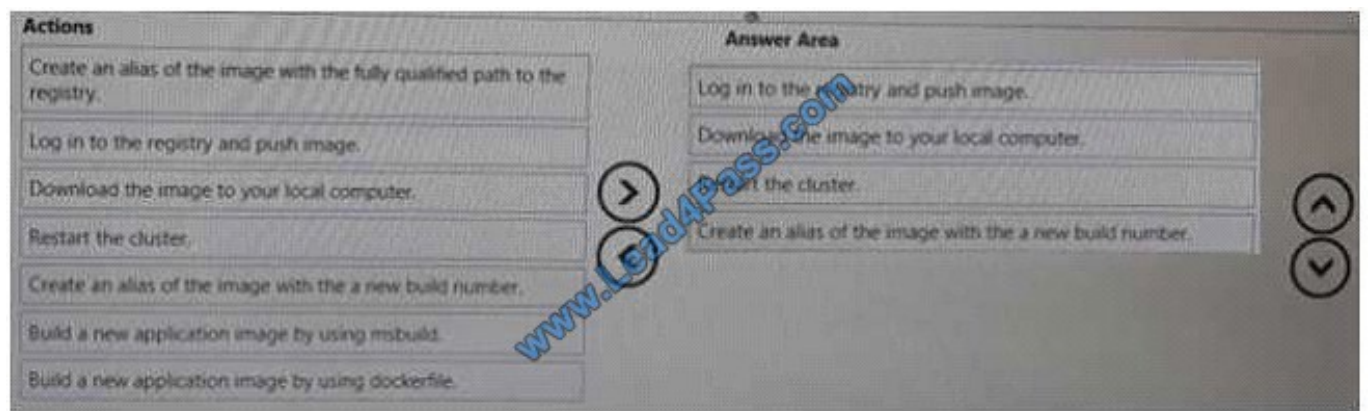

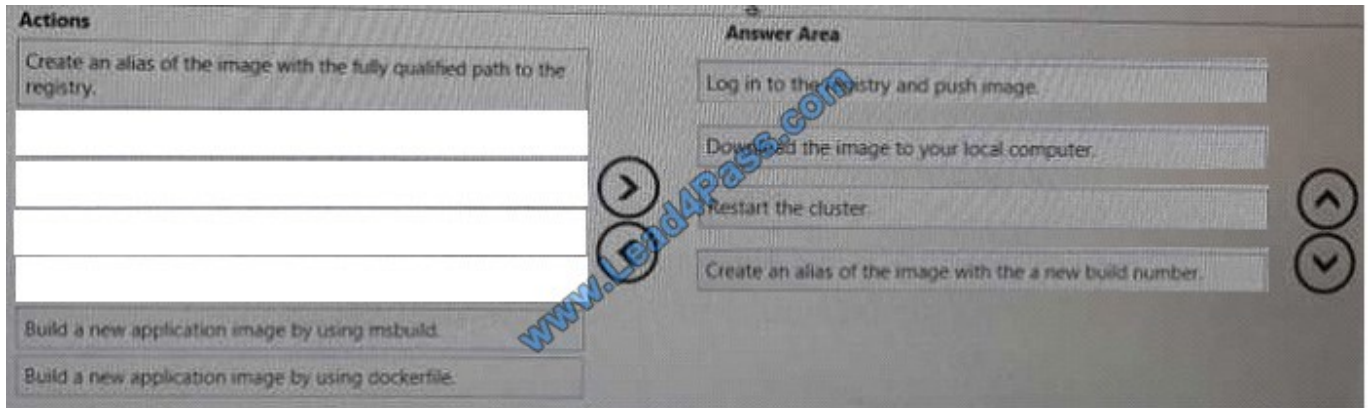

Which three actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Create an alias of the image with the fully qualified path to the registry.	
Log in to the registry and push image.	
Download the image to your local computer.	
Restart the cluster.	
Create an alias of the image with the a new build number.	
Build a new application image by using msbuild.	
Build a new application image by using dockerfile.	

Correct Answer:

QUESTION 3

You need to access user claims in the e-commerce web app* What should you do first?

- A. Update the e-commerce web app to read the HTTP request header values.
- B. Assign the Contributor RBAC role to the e-commerce web app by using the Resource Manager create role assignment API.
- C. Write custom code to make a Microsoft Graph API call from the e-commerce web app.
- D. Using the Azure CU enable Cross-origin resource sharing (CORS) from the e-commerce checkout API to the e-commerce web app

Correct Answer: C

QUESTION 4

You are developing an Azure web application to store and archive patient medical records in Azure.

You need to configure data storage to meet the following policies:

Ensure that you can configure a retention period for patient records.

Archived data must be readable.

Archived data must not be modified or deleted.

Which Azure storage service should you use?

- A. Azure files
- B. Azure Blobs
- C. Azure Queues
- D. Azure Tables

Correct Answer: C

QUESTION 5

Note: This question is part of a series of questions the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to meet the LabelMaker application security requirement.

Solution: Create a conditional access policy and assign it to the Azure Kubernetes Service cluster.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A
