QUESTION 1

You develop a payment processing solution by using a .NET Framework application.

Customer data is spread across multiple Azure SQL Database servers and is not sharded. When a payment is made from one person to another person, data may be changed in multiple databases at once. You need to ensure transactional

atomicity across databases. Which two actions should you perform? Each correct answer presents part of the solution.

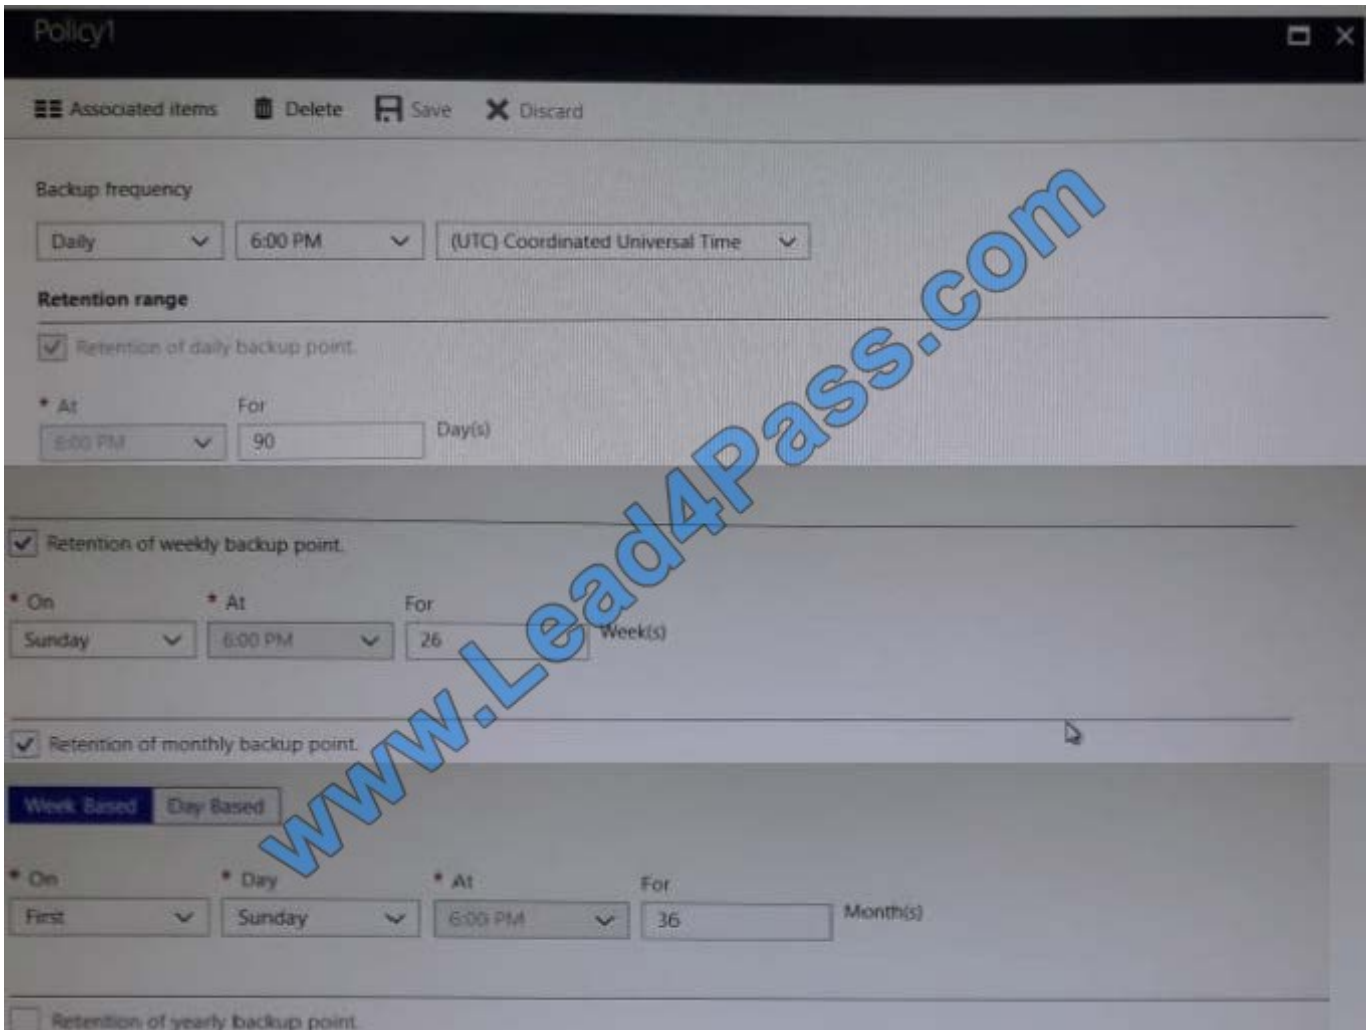

NOTE: Each correct selection is worth one point.

- A. In the solution, use the `OpenConnectionForKey` function to reference each database that will be included during a distributed transaction.
- B. In Azure PowerShell, create a new communication relationship between each database that requires distributed transactions.
- C. Use the Microsoft Distributed Transaction Coordination (MS DTC) service to configure distributed transactions between each database.
- D. In the solution, create new `SqlConnection` objects for each database that will be included during a distributed transaction.

Correct Answer: BD

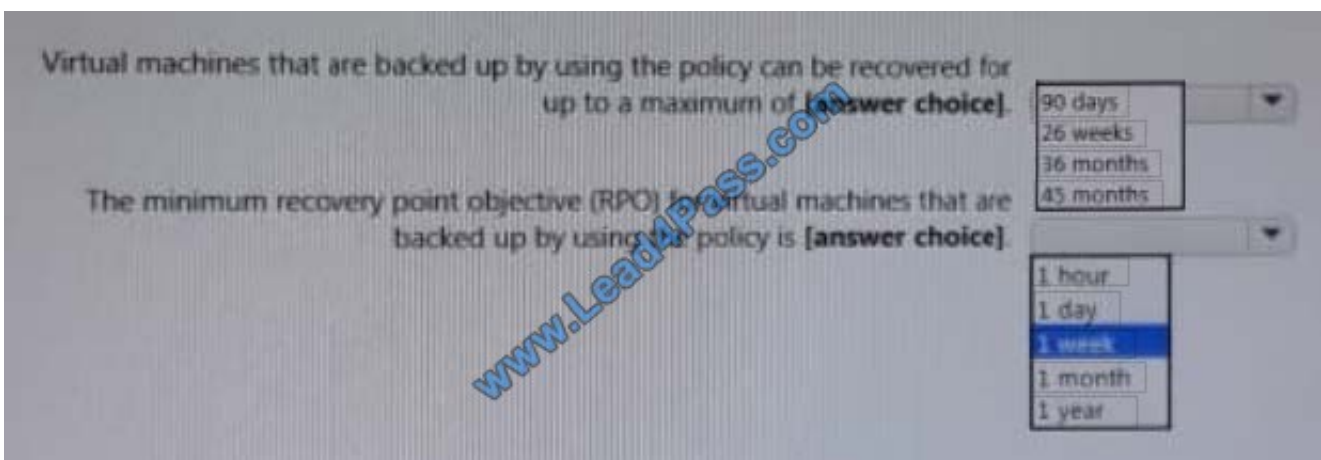

QUESTION 2

You plan to deploy the backup shown in the following exhibit.

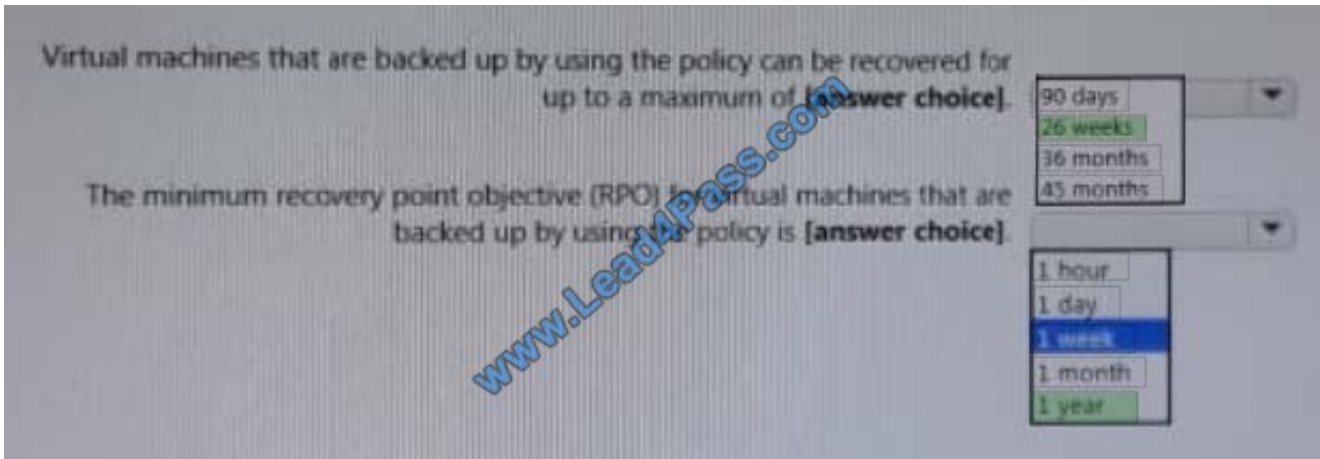

Use the drop-down to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

QUESTION 3

DRAG DROP

You have an on-premises file server named Server1 that runs Windows Server 2016.

You have an Azure subscription that contains an Azure file share. You deploy an Azure File Sync Storage Sync Service, and you create a sync group.

You need to synchronize files from Server1 to Azure.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Create an Azure on-premises data gateway.
- Install the Azure File Sync agent on Server 1.
- Create a Recovery Services vault.
- Register Server 1.
- Install the DFS Replication server role on Server 1.
- Add a server endpoint.

Answer Area

Correct Answer:

Actions

Create an Azure on-premises data gateway.

Install the Azure File Sync agent on Server1.

Create a Recovery Services vault.

Answer Area

Install the DFS Replication server role on Server1.

Register Server1.

Add a server endpoint.

Step 1: Install the Azure File Sync agent on Server1

The Azure File Sync agent is a downloadable package that enables Windows Server to be synced with an Azure file share

Step 2: Register Server1.

Register Windows Server with Storage Sync Service

Registering your Windows Server with a Storage Sync Service establishes a trust relationship between your server (or cluster) and the Storage Sync Service.

Step 3: Add a server endpoint

Create a sync group and a cloud endpoint.

A sync group defines the sync topology for a set of files. Endpoints within a sync group are kept in sync with each other. A sync group must contain one cloud endpoint, which represents an Azure file share and one or more server endpoints.

A server endpoint represents a path on registered server.

QUESTION 4

You need to complete the order payment process.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Intercept the message by using middleware. Send the message to a payment service.
- B. Acknowledge the callback by sending an HTTP response.
- C. Set the value of the Card Action object Type property toPostBack.
- D. Verify that the amount and currency values in the payment token folder are valid.

Correct Answer: D

QUESTION 5

HOTSPOT

Your company has offices in New York and Los Angeles.

You have an Azure subscription that contains an Azure virtual network named VNet1. Each office has a site-to-site VPN connection to VNet1. Each network uses the address spaces shown in the following table:

Location	IP address space
VNet1	192.168.0.0/20
New York	10.0.0.0/16
Los Angeles	10.10.0.0/16

You need to ensure that all Internet-bound traffic from VNet1 is routed through the New York office.

What should you do? To answer, select the appropriate options in the answer area; NOTE: Each correct selection is worth one point.

Hot Area:

In Azure, run:

	v
New-AzureRmLocalNetworkGateway	
New-AzureRmVirtualNetworkGatewayConnection	
Set-AzureRmVirtualNetworkGatewayDefaultSite	

On a VPN device in the New York office, set the traffic selectors to:

	v
0.0.0.0/0	
10.0.0.0/16	
192.168.0.0/20	

Correct Answer:

In Azure, run:

	V
New-AzureRmLocalNetworkGateway	
New-AzureRmVirtualNetworkGatewayConnection	
Set-AzureRmVirtualNetworkGatewayDefaultSite	

On a VPN device in the New York office, set the traffic selectors to:

	V
0.0.0.0/0	
10.0.0.0/16	
192.168.0.0/20
