QUESTION 1

DRAG DROP

You have an Azure subscription. The subscription contains Azure virtual machines that run Windows Server 2016 and Linux.

You need to use Azure Log Analytics design an alerting strategy for security-related events.

Which Log Analytics tables should you query? To answer, drag the appropriate tables to the correct log types. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tables	Answer Area
AzureActivity	Events from Windows event logs: <input type="text" value="Table"/>
AzureDiagnostics	Events from Linux system logging: <input type="text" value="Table"/>
Event	
Syslog	

Correct Answer:

Tables	Answer Area
AzureActivity	Events from Windows event logs: <input type="text" value="Event"/>
AzureDiagnostics	Events from Linux system logging: <input type="text" value="Syslog"/>

Windows Event logs --> Information sent to the Windows event logging system. Syslog -->Information sent to the Linux event logging system.

QUESTION 2

DRAG DROP

You plan to import data from your on-premises environment to Azure. The data is shown in the following table.

On-premises source	Azure target
A Microsoft SQL Server 2012 database	An Azure SQL database
A table in a Microsoft SQL Server 2014 database	An Azure Cosmos DB account that uses the SQL API

What should you recommend using to migrate the data? To answer, drag the appropriate tools to the correct data sources-Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- AzCopy
- Azure Cosmos DB Data Migration Tool
- Data Management Gateway
- Data Migration Assistant

Answer Area

From the SQL Server 2012 database:

From the table in the SQL Server 2014 database:

Correct Answer:

Tools

- AzCopy
-
- Data Management Gateway
-

Answer Area

From the SQL Server 2012

From the table in the SQL Server 2014

Answer Area

From the SQL Server 2012 database:

From the table in the SQL Server 2014 database:

QUESTION 3

Your company plans to deploy various Azure App Service instances that will use Azure SQL databases. The App Service instances will be deployed at the same time as the Azure SQL databases.

The company has a regulatory requirement to deploy the App Service instances only to specific Azure regions. The resources for the App Service instances must reside in the same region.

You need to recommend a solution to meet the regulatory requirement.

Solution: You recommend using the Regulatory compliance dashboard in Microsoft Defender for Cloud.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 4

After you migrate App1 to Azure, you need to enforce the data modification requirements to meet the security and compliance requirements. What should you do?

- A. Create an access policy for the blob service.
- B. Implement Azure resource locks.
- C. Create Azure RBAC assignments.
- D. Modify the access level of the blob service.

Correct Answer: A

Scenario: Once App1 is migrated to Azure, you must ensure that new data can be written to the app, and the modification of new and existing data is prevented for a period of three years.

As an administrator, you can lock a subscription, resource group, or resource to prevent other users in your organization from accidentally deleting or modifying critical resources. The lock overrides any permissions the user might have.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/lock-resources>

QUESTION 5

You have 100 devices that write performance data to Azure Blob Storage.

You plan to store and analyze the performance data in an Azure SQL database.

You need to recommend a solution to continually copy the performance data to the Azure SQL database.

What should you include in the recommendation?

- A. Azure Data Factory
- B. Data Migration Assistant (DMA)
- C. Azure Data Box
- D. Azure Database Migration Service

Correct Answer: A
