**QUESTION 1**

During a technical review, the Client raises a need to display product pricingon the Product Detail Page (PDP) with discounted values per promotion. The Client notes customers complained of bad user experiences in the past when they would add a product to the basket from the cached PDP and then see a higher price when they started checkout as the promotion had expired.

What should the Architect suggest be implemented for this given that performance should be minimally impact?

A. Remove caching of the product page during the promotion.

B. Adjust the PDP to have a low caching period during the promotion.

C. Modify the page to vary the cache by price and promotion.

D. Create a separate template or view based on the promotion.

Correct Answer: C

**QUESTION 2**

Northern Trail Outfitters (NTO) wants to migrate its online shoo from a custom ecommerce platformto B2C Commerce. NTO needs to migrate several thousands of customer records profile information, address book). WTO can provide a B2C Commerce feed. It is currently using SHA-256 as an encryption mechanism for the customer passwords.

What approach can theArchitect propose?

A. Import the customer records, including the hashed password, as B2C Commerce supports SHA-2S6, and they will be able to login with their existing password.

B. Do not import customer records and asks customers to create new accounts the first fame they try to log in to the B2C Commerce storefront.

C. Import the customer records, excluding the password field, and B2C Commerce will automatically require a password reset the first time a customer logs m to the storefront.

D. Import the customer records, with the hashed password as a custom attribute, and during the login compare the entered password with the hashed password and save it in the password field.

Correct Answer: D

**QUESTION 3**

The client provided these business requirements:

1.

The B2C Commerce platform will integratewith the Client s Order Management System (OMS).

2.

The OMS supports Integration using REST services.

3.

The OMS is hosted on the Clients infrastructure. Whet configurations are needed for this integration with the OMS?

A. A service configuration, ahostname alias configuration, and a user credential configuration.
