Correct Answer: B

---

### QUESTION 3

What does the Twelve Factor App methodology define a 'backing service' as?

A. Any service that is contained within the application to manage state.

B. Any service the application consumes over the network as part of its normal operation.

C. Any service that is disposable, meaning it can be started or stopped at a moment's notice.

D. Any resource managed by the same systems administrators as the applications runtime deploy.

Correct Answer: B

---

### QUESTION 4

What are two features of Compose for Redis?

A. Slow logs

B. SSL binding

C. TLS encryption

D. NoSQL deployment

E. Continuous integration

Correct Answer: BC

---

### QUESTION 5

What is the rationale for including Content Delivery Network (CDN) services in the Web Application Reference Architecture for IBM Cloud?

A. To make files available for FTP from a local server.

B. To manage the development of files across a network of content creators.

C. To store HTML content, images, videos, cascading style sheets, JavaScript files, and user-generated content.

D. To distribute content in geographically diverse nodes and shorten the distance it has to travel to get to an end user.

Correct Answer: D
