QUESTION 1

An administrator has been tasked to run all health checks at once using the DrQ command before a major event happens, such as an upgrade.

What does the DrQ command do?

- A. It runs all available checks in /opt/ibm/si/diagnostiq with the checkup mode and with the summary output mode.
- B. It shows all the available drives on the QRadar managed host.
- C. It runs all available checks in /opt/ibm/si/diagnostiq and writes the results in a txt file.
- D. It checks all the available drives on the QRadar managed host and writes the results on a txt file.

Correct Answer: A
