## QUESTION 1

In an environment with one IBM z14 and one z/OS LPAR, what component would contribute to higher availability?

- A. Dual HMC setup
- B. Three Phase Line cord
- C. Parallel Sysplex
- D. RAIM Memory technology

Correct Answer: C

## QUESTION 2

A client wants to add the Live Guest Relocation (LGR) feature to their IBM Z environment. Which of the following actions supports this requirement?

- A. Enabling Single System Image (SSI) on z/OS v2.3 or newer
- B. Applying the latest APAR to z/VM v5.4
- C. Enabling Security Server on z/OS
- D. Enabling Single System Image (SSI) on z/VM v6.4 or newer

Correct Answer: A

---

## QUESTION 3

Due to recent data protection legislation, your client has asked how to protect the integrity of their z/OS audit records.

What system function should be recommended?

- A. Pervasive Encryption
- B. zSecure Audit
- C. Crypto Express adapter
- D. Signed SMF data

Correct Answer: A

## QUESTION 4

A customer starts using z/OS Encryption Readiness Technology (zERT) to gather knowledge about the state of encrypted network traffic in their system. They also use Sysplex Distributor, so there is TLS-encrypted traffic routed through the distributor systems to application hosts. The distributor systems also host TLS-encrypted TN3270 services for the network.

They started gathering data from the Sysplex Distributor hosts, since encrypted traffic is routed through those systems. A large number of encrypted TCP sessions seem to be missing from the customer's analysis.

What does the customer need to do to gather full analysis data?

- A. Start gathering zERT data on all z/OS systems in their environment.
- B. Configure the zERT collection correctly on the Sysplex Distributor hosts.
- C. Move the collection of data to the z/OS application data hosts.
- D. Move the collection of data to the network routers neighboring the z/OS systems.

Correct Answer: D

---

## QUESTION 5

What customer records are required to quickly assess system performance in a z/OS environment?

- A. RMF report showing FICON channel statistics
- B. Network TCP records
- C. SCRT records
- D. SMF type 70 and 113 records

Correct Answer: D
