**QUESTION 1**

To optimize the user experience for dashboards and explorations. Framework Manager packages must be enriched. Which statement is true about enriching Framework Manager packages?

- A. A developer can't enrich a package that includes dimensionally modeled (DMR) relational objects.
- B. Framework Manager packages are automatically enriched when published to Cognos Analytics.
- C. To access the enrich package functionality, you need read/execute/traverse permissions for the package.
- D. In order to have enough data to support the AI-functions in your dashboards and explorations, the entire Framework Manager package must be enriched.

Correct Answer: D

---

**QUESTION 2**

In an Exploration "Data relationships" view, what does the thickness of the lines between data items represent?

- A. the statistical strength of the relationship between the data items
- B. the flow of information between categories, ie. money transfers between countries
- C. the cardinality of one data item when grouped by another, ie. thicker signifies more unique values
- D. the weighted average of each measure value compared with other measures

Correct Answer: A

**QUESTION 3**

What advantage does multidimensional report writing have on query maintenance for complex queries?

- A. There is no need to use calculations as the data source contains all the required data items.
- B. Fewer queries are required and the need for unions of queries is reduced due to the flexibility of MDX.
- C. Unions and Joins are always required for queries making it easier for a developer to understand the query intent.
- D. There is no advantage and multidimensional query constructs should be avoided.

Correct Answer: B

---

**QUESTION 4**

Which of the following is an example of when the query cache would avoid roundtrips to the database?

- A. repetitive master-detail requests
- B. drill through reports
- C. reports with multiple queries
- D. drill down reports

Correct Answer: A

---

## QUESTION 5

A developer is given the task of creating an information panel to be displayed in the foyer of the office. Which Cognos Analytics capability gives the best impact with minimal work?

- A. Story played in Kiosk mode with a loop
- B. Bespoke report using JavaScript
- C. Cognos Viewer Report
- D. Dashboard based on Exploration content

Correct Answer: C
