QUESTION 1

A customer has a compute resource in their private datacenter which they need to securely connect to compute resources in the IBM Virtual Private Cloud. How can this be achieved?

- A. Create a Security Group rule that explicitly blocks any other traffic
- B. Configure a Vyatta Secure Gateway at the VPC entry point
- C. Use an IBM Cloud VPN for VPC
- D. Direct all commands via the ibmcloud CLI

Correct Answer: C

QUESTION 2

A VPC has been created with a single subnet. Virtual server instances have been deployed on the subnet that have different functions which support a production application. The security team has now said that they want to ensure that network traffic between the different server types can be controlled. How can this be achieved?

- A. Create a VPC load balancer and place each server type into its own back-end pool, then create Layer-7 routing policies that restrict network traffic flowing between the different pools
- B. Use a Hardware Security Module to create advanced network routing tables that ensure traffic does not route between server ^ types, as per the security tearruTMs wishes
- C. Create security groups for the different server types with inbound and outbound rules that satisfy the security team, into which the VSIs can be placed
- D. Create multiple access control lists with rules that satisfy the security tearruTMs requirements and associate each VSI to the respective ACL

Correct Answer: B

QUESTION 3

When connecting an Application Server running on a VSI to a database server running on Bare Metal in IBM Cloud, which of the following is the recommended connectivity option at the lowest cost?

- A. Via a Direct Link VPN
- B. Over the IBM Cloud private network
- C. Through the public network
- D. Using VPC VPN

Correct Answer: B

QUESTION 4

Which of the following IBM Cloud Paks provides AI capabilities?

- A. IBM Cloud Pak for Data
- B. IBM Cloud Pak for Application
- C. IBM Cloud Pak for AI
- D. IBM Cloud Pak for Integration

Correct Answer: A

QUESTION 5

What is the minimum number of servers an Event Stream cluster in IBM Cloud must be composed of?

- A. One
- B. Two servers
- C. Four servers in load balance
- D. Three servers

Correct Answer: D
