QUESTION 1

Which statement describes how garbage collection is used?

A. Garbage collection frees memory by removing dead objects from the heap.

B. Garbage collection compresses the heap space through data compression.

C. Garbage collection forces the freeing of memory in the heap by dumping the objects in the order of least used to most used.

D. Garbage collection uses a properly tuned garbage collection agent to gather unused data in the heap and purge it from the system.

Correct Answer: A

QUESTION 2

After installing IBM Maximo Asset Management V7.5 (Maximo), an administrator connects to the database and runs this query:

Select * from maxvars where varname=TMAXUPGT

When the SQL query tool returns an error such as "No object found" or "Table or view does not exist," which statement is true?

A. The Maximo database has been created but Maximo objects have not been installed.

B. Maximo is installed but database privileges have not been granted to the Maximo database or schema owner.

C. The Maximo EAR file must be deployed and the application server must be started before the database can be accessed.

D. The Maximo database has been created but the table that includes the database version must be created and then populated manually.

Correct Answer: A

QUESTION 3

What does the system property mxe.LDAPUserMgmt=0 do in IBM Maximo Asset Management V7.5 (Maximo)?

A. It enables native user configuration.

B. It disables Maximo user authentication.

C. It enables user management synchronization.

D. It disables the cron tasks that import users from a LDAP capable server.

Correct Answer: A

QUESTION 4

User Access Control can be disabled to permit the IBM Maximo Asset Management V7.5 installation to take which action?

A. to create log files

B. to run as administrator

C. to update the database

D. to update the maximo.properties file

Correct Answer: D

QUESTION 5
