QUESTION 1

How can a non-master operator view all the results in the IBM Endpoint Manager console for an analysis that was globally activated?

- A. All Content domain > Analyses node, select the analysis in the list pane, and select the results tab in the work area.
- B. Analyses domain > All Content node, select the content in the list pane, and select the computers tab in the work area.
- C. All Content domain > Computers node, select each computer individually, and view the Summary tab for each computer.
- D. BigFix Management domain > Computers node, select each computer individually, and view the Summary tab for each computer.

Correct Answer: C

QUESTION 2

An operator who can create custom content has been given access to a variety of sites including Patches for Windows (English) and Windows QA, a custom site for testing patches. Four months ago she created a baseline that included 130 updates and published it into the Windows QA site. She needs to deploy this baseline to 100 computers that recently came online. She notices that many of the Windows patches in the baseline are out of date because she see the message: Source Fixlet differs. What does the operator need to do to correct this issue?

- A. Recreate the entire baseline from scratch.
- B. Use the Sync All Components button in the baseline.
- C. Split the patches into two baselines; a baseline cannot be created that has 130 Fixlets.
- D. Remove the Fixlets from the baseline that have the message - Source Fixlet differs; they have been discontinued by Microsoft.

Correct Answer: B

QUESTION 3

A user has recently deployed an action to a group of endpoints she currently manages. Several of these machines are reporting Constrained in their Last Reported Status of the action. What does this mean?

- A. The action was not given enough time to run on the endpoint before it expired.
- B. The downloads within the action are too large for the client cache. The cache size must be increased.
- C. Scheduling criteria has been set in the Execution tab of the Take Action Dialog which has not been met
- D. The endpoint was shut down during execution and is waiting for the machine to send a heart beat to the server.

Correct Answer: C

QUESTION 4

Patch Management for AIX has various methods for obtaining updated files. Which native AIX method can IBM Endpoint Manager integrate with?

- A. AIX Download plug-in
- B. AIX Download Cacher
- C. Yellowdog Update Manager (YUM)
- D. Network Installation Management (NIM)

Correct Answer: D

(ibm docURL=/common/ssi/rep_ca/4/897/ENUS214-014/index.html&lang=en&request_locale=en endpoint manager for patch management improvements))

QUESTION 5

An operator just received an analysis in .bes format and would like to test the content. How can the analysis be imported into the IBM Endpoint Manager (IEM) console for testing?

- A. Only Fixlets and tasks can be imported into IEM, not analyses.
- B. In the IEM console select the Analyses node, right-click and select Import. The analysis will be activated automatically when it is imported.
- C. Double-click the .bes file, select the appropriate Site and Domain, and click OK to save. The analysis will be activated automatically when it is imported.
- D. In the IEM console, All Content Domain, Fixlets and Tasks node: right-click the .bes files to import. The analysis will be activated automatically when it is imported.

Correct Answer: B
