A. TSM V5 server directory

B. TSMV7.1 server directory

C. TSM V5 upgrade directory

D. TSMV7.1 upgrade directory

Correct Answer: C

QUESTION 4

A customer is upgrading their environment from IBM Tivoli Storage Manager (TSM) V5.5 to TSM V7.1. Which three new skills are required for the existing storage administrator with system privileges?

A. defining DB2 volumes

B. defining database space

C. defining active data pools

D. managing recovery log volumes

E. managing a database reorganization

F. managing multiple stream database backups

Correct Answer: ADF

QUESTION 5

An Oracle database is protected with IBM Tivoli Storage Manager (TSM) for Database and Oracle Recovery Manager. The Service Level Agreement defines that the logs must be written twice and immediately during the log archiving process. The storage pool destination is a sequential file pool and the data cannot be mirrored. How can this requirement be fulfilled?

A. Use the Simultaneous Write function during migration.

B. Use the Mirror option in the TSM API option file tdpo.opt.

C. Use the Simultaneous Write function from the client during backup.

D. Take the backup of the logs twice to different storage pool destinations.

Correct Answer: B
