QUESTION 1

Which value if updated on a preventive maintenance (PM) record will cause a deletion of an existing forecast?

- A. Changing the description
- B. Adding a new seasonal date
- C. Changing the lead time value
- D. Changing the work order status

Correct Answer: B

QUESTION 2

How should a user create an association between items and an asset?

- A. Go to the Assets application and from the Items tab, add the items.
- B. Go to the Assets application and from the Spare Parts tab, add the items.
- C. Go to the Assets application and from the Select Action menu, choose Associate Items.
- D. Go to the Assets application and from the Select Action menu, choose Add/Modify Asset.

Correct Answer: C

QUESTION 3

What is a valid statement when work order tasks are generated for each route stop?

- A. Route stops are sometimes bypassed
- B. Work flows cannot control route stops
- C. Route stops that become work order tasks will not support job plans
- D. Locations of all route stops must be associated with an organization

Correct Answer: C

QUESTION 4

When a location's status is changed to Decommissioned, what happens with preventive maintenance (PM) records associated with the location?

- A. PM's cannot be associated to the location.

- B. Set PMs to inactive for location from the Select Actions menu.
- C. Nothing happens because a PM can be active in a decommissioned location.
- D. Check the appropriate check box in the Change Status dialog box of the Locations application so all PM's are set to Inactive.

Correct Answer: D

QUESTION 5

Which tab in the Query-based Reporting dialog allows fields to be added to the report?

- A. Style
- B. Select
- C. Format
- D. Submit

Correct Answer: B
