QUESTION 1

The Building form utilizes a Contact query section to show all contacts associated to the Building. A user says that he remembers adding multiple contacts to the Building record last week but now no contacts appear in the Contact query section. When troubleshooting the associations, which statement is true?

- A. The association filter used in the query must also have the association defined in the Report Manager.
- B. The association filter for the query in the query section is no longer filtering by the association string created when the form adds records.
- C. The association filter used in the query must match what is defined in the Data Modeler's Association List for the Building business object (BO).
- D. The association filter used in the query must match what is defined in the Association Manager between the Building and Contact BO.

Correct Answer: B

QUESTION 2

A field level formula that depends on a query has been modified within a business object. The query did not change. Which cache must be cleared?

- A. UOM Data
- B. State Data
- C. Query Cache
- D. Extended Formula Cache

Correct Answer: D

QUESTION 3

A change is made in a state transition configuration in Data Modeler but it has not carried over correctly at runtime. Why?

- A. The developer did not import the state transition in Data Modeler.
- B. The developer did not click Apply in the state transition properties.
- C. The developer did not publish the form of the base business object (BO).
- D. The developer did not make the change in the base BO in Data Modeler.

Correct Answer: B

QUESTION 4

State actions can only be added to which query?

- A. An editable query
- B. A metric type query
- C. A hierarchy type query
- D. A query with associated business objects

Correct Answer: A

QUESTION 5

Which statement is true regarding building a form?

- A. Sections can be added to the form without being defined in the business object (BO).
- B. Data fields can be added to the form without being defined in the BO.
- C. Locator fields can be added to the form without being defined in the BO.
- D. Smart sections can be added to the form without being defined in the BO.

Correct Answer: A
