QUESTION 1

If you build an expression manually, as opposed to using a function (e.g., specify $(V1+V2)/2$ instead of $MEAN(V1, V2)$), which statement is true?

- A. If any of the variables used in the expression has a missing value, it will be ignored and the expression will proceed to evaluate with variables that have valid values.
- B. It will always return a valid value for each case, regardless of whether one or more of the source variable values are missing.
- C. If any of the variables used in the expression has a missing value, the result for that case is a system-missing value.
- D. If any of the variables used in the expression has a missing value, you will get a notification pointing this out before you proceed.
