QUESTION 1

Why would you use Rebuild over Recalc in an Active Form?

- A. When a conditional format on a report changes
- B. When metadata is added to the TM1 model that must be displayed on the row
- C. When data changes along the rows of a report
- D. When a leaf element is added to a consolidated element of a report

Correct Answer: B

QUESTION 2

Click the Exhibit button.

The screenshot shows a window titled 'Cube Viewer: GO_New_Stores->Produ...'. Below the menu bar (File, Edit, View, Options, Help) is a toolbar with icons for save, refresh, and a dropdown menu. A dropdown menu is set to 'Budget version 1'. The main area displays a table with the following data:

| Price and Cost | | |
|--------------------|-----------------|-----------|
| Products | Unit sale price | Unit cost |
| Cooking Gear | 40.31 | 29.87 |
| Lanterns | 29.12 | 21.14 |
| Packs | 175.37 | 126.51 |
| Sleeping Bags | 103.83 | 78.01 |
| Tents | 453.41 | 385.04 |
| Golf Accessories | 60.68 | 28.37 |
| Irons | 598.90 | 345.95 |
| Putters | 116.07 | 62.55 |
| Woods | 948.91 | 550.10 |
| Climbing Accessori | 32.00 | 21.10 |
| Rope | 293.57 | 220.00 |
| Safety | 72.44 | 48.68 |
| Tools | 56.07 | 38.14 |
| First Aid | 11.41 | 8.02 |
| Insect Repellents | 6.07 | 2.30 |

The 'Sleeping Bags' row is highlighted in yellow. The status bar at the bottom left shows the value '103.83'.

In the cube shown in the exhibit, you need to show only the five most expensive products. The list should change dynamically with the selection of the budget version.

How would you achieve this?

- A. Create a filtered subset for products with the option TopSum.
- B. Create a view filter with the option TopSum.
- C. Create a filtered subset for products with the option TopCount,
- D. Create a view filter with the option TopCount.

Correct Answer: D

QUESTION 3

You need to calculate a ratio on all levels in IBM Cognos Insight. Which action would you take?

- A. Create a calculation for C and N elements.
- B. Create a calculation and set the calculation order to Summarize First.
- C. Create a calculation for all elements.
- D. Create a calculation and set the calculation order to Calculate First.

Correct Answer: B

QUESTION 4

Which three statements are true regarding TM1 Excel functions? (Choose three.)

- A. The VIEW function creates an optimized view of the cube specified by the cube argument.
- B. The DBR function stands for Database Read.
- C. The value returned by the DBRA function cannot be edited.
- D. ELCOMP returns the name of a child of a consolidated element in a specified dimension
- E. SUBNM returns the element of a dimension subset and allows a double-click to bring up the subset editor.

Correct Answer: ADE

QUESTION 5

There has been a number of requests by users to have an option to easily select quarters for their views, rather than having to select the individual quarters every time they go into their views.

Which solution meets this requirement?

- A. A new public view should be created.
- B. A new private subset should be created.
- C. A new public subset should be created.
- D. A new alias should be created.

Correct Answer: C
