QUESTION 1

What policy assignment can be used to assign policy settings to individual users and groups in a Policy document?

- A. Explicit policies
- B. Server document
- C. Dynamic policies
- D. Organizational policies

Correct Answer: C

QUESTION 2

David's company wants to append a message disclaimer at the bottom of every outgoing e-mail for legal purposes. What must he do to achieve that?

- A. Create an outgoing SMTP Rule applying the message disclaimer text.
- B. Create a Mail Settings policy document, enter the disclaimer text, and apply to all users.
- C. David must instruct all of his users to modify their e-mail signatures to include the disclaimer text.
- D. Enter the disclaimer text into the Router/SMTP section of the server's Configuration document. Then create a Mail Settings policy document enabling the disclaimer, and apply to all users.

Correct Answer: B

QUESTION 3

An administrator needs to add an additional explicit policy to a group of test users. What tool can the administrator use to verify whether or not the settings are being applied correctly?

- A. The administrator can issue the command Show policy on the IBM Domino console.
- B. The administrator can perform a detailed policy synopsis from the Domino Administrator client.
- C. No tool is available but the administrator can wait to see if the settings are applied to the users.
- D. The administrator can Issue the command tell adminp process all, as it will output any errors it might encounter.

Correct Answer: B

QUESTION 4

Where is username and password information stored following successful session authentication?

- A. browser cache
- B. browser cookie
- C. browser volatile memory
- D. nowhere, as this would be a security risk

Correct Answer: B
