**QUESTION 1**

James is debugging server-side JavaScript on the server. Graham is developing on the server and his page stops working. How should this be resolved?

- A. Graham needs to disable the debugging configuration on his system.
- B. Graham needs to remove "debugger;" lines and breakpoints from his code.
- C. James must remove his name from Graham's application's access control list.
- D. James must uncheck the option "Stop at first line of server-side JavaScript in All Javascript".

Correct Answer: D

---

**QUESTION 2**

Harry would like to debug the Dojo JavaScript files added to an XPage, but when he does examine the JavaScript code, it is not readable. What would he need to do to debug the Dojo JavaScript code?

- A. Use the new server-side JavaScript Debugger.
- B. Go to the Dojo site and download the uncompressed Dojo files.
- C. Turn on the Use JavaScript when generating pages option in the Application Properties
- D. Check the box next to the "Use uncompressed resource files (CSS and Dojo)" in the XSP properties.

Correct Answer: D

---

**QUESTION 3**

Elaine has added a Name Picker with a dominoViewNamePicker dataProvider. How does she define which column the value should be picked from?

- A. The same value will be used for the label and the value.
- B. The value will be picked from the first sorted column in the view.
- C. Set the valueColumn property to the programmatic name of the relevant column.
- D. Set the valueColumn property to the index of the relevant column, where the column indices start at 0.

Correct Answer: B

---

**QUESTION 4**

Theo wants to use the Data View control to display a view that has a two-level categorization. How can he achieve this?

- A. Theo must use a repeat control instead.
- B. Theo should add two viewCategoryColumn objects to the categoryColumn property of the Data View control.
- C. Theo must change the design of the underlying view so there is only one level of categorization. The Data View control does not support multi-level categorization.
- D. Theo must use the categoryRow facet and build the two-level categorization because the Data View control's categoryColumn property can only accept one column.

Correct Answer: B

---

## QUESTION 5

What does the disableHideRow property provide on the Data View control?

- A. The property automatically shows the details facet and does not allow the user to hide the detail.
- B. The property automatically shows response documents and does not allow the user to hide them.
- C. The property does not allow the user to hide the detail, but requires expandedDetail="true" to be set.
- D. The property does not allow the user to hide response documents, but requires collapsibleRows="true" to be set.

Correct Answer: A
