QUESTION 1

An administrator adds User A to an IBM Notes Traveler device settings document, which requires an alphanumeric password for Apple devices. The administrator then adds User A to Group A, which is listed in the Notes Traveler Policy Settings document. The Notes Traveler Policy Settings document requires Apple users to have a device password length of 6.

What behavior will User A experience on the device?

A. User A will be required to have an alphanumeric password.

B. User A will be required to have the device password length of 6 characters.

C. User A will not be prompted for a password at all because two policies have been applied.

D. User A will not be prompted because this security option is not supported for Apple devices.
