QUESTION 1

Sarah must install IBM WebSphere Application Server 8.5.5 on Linux as a prerequisite of the IBM WebSphere Portal installation.

Which shell must her operating system be using?

- A. ksh
- B. csh
- C. bash
- D. dash

Correct Answer: A

QUESTION 2

Anya administers an IBM WebSphere Portal server in a development environment but she did not install or initially configure it. The developers complain that they cannot access the session identifier on the client side. Anya knows that the session identifier is set because she sees JSESSIONID in incoming web container traces.

What should she check next?

- A. Whether security integration has been disabled.
- B. Whether the persistent.session.level is set correctly.
- C. Whether the HTTPOnly attribute is set on the JSESSIONID cookie.
- D. Whether another application is overwriting the JSESSIONID in the cookie store of the browser.

Correct Answer: D

QUESTION 3

During migration of a clustered portal environment, which two tasks are mandatory before migration is started? (Choose two.)

- A. Remove passwords from the configuration files.
- B. Turn off automatic synchronization on all nodes.
- C. Update the theme to be compatible with version 8.5.
- D. Stop the source deployment manager and node agents.
- E. Ensure that passwords in the source environment are different from the target environment.

Correct Answer: BD

QUESTION 4

In IBM Installation Manager, what type of resources are in a directory for a package group?

- A. resources that packages share with themselves
- B. resources that packages share with other packages in another group
- C. resources that packages share with other packages in the same group
- D. resources that packages share with the same packages in the same group

Correct Answer: C

QUESTION 5

To change the context root (URI) of a WSRP Producer portal, which action must be performed?

- A. Redeploy all WSRP portlets.
- B. Run the modify-servlet-path configuration task.
- C. Redeploy all WSRP portlets and restart the portal server.
- D. Redeploy all WSRP portlets and run the modify-servlet-path configuration task.

Correct Answer: B
