**QUESTION 1**

George is using the PortletStateManager getPortletStateManager ( PortletRequest request, PortletResponse response) method in his portlet code.

Where should George use this method in his code for best performance?

- A. init
- B. doEdit
- C. doview
- D. processAction

Correct Answer: B

:

PortletStateManager getPortletStateManager( PortletRequest request, PortletResponse response)

This method returns a PortletStateManager object which you can use during action processing and rendering (for example in the processAction method, doView method, doEdit method, etc.). The PortletStateManager interface adds

additional methods to extend the generic StateManagerService interface, which, for example, allows you to directly read the current request-specific navigational state of the portlet (portlet mode, window state, and render parameters).
