QUESTION 1

When developing with IBM Web Sphere Portal 8.5 themes, which parameter for the r:datasource tag will help speed up development by requiring fewer server restarts?

A. max-age

B. theme-uri

C. reloadInterval

D. reloadingEnabled

Correct Answer: D

Explanation: DB2 data source, automatic client reroute enabled, restart admin

QUESTION 2

Which life cycle method of a portlet do the doView, doEdit and doHelp methods represent?

A. init

B. render

C. destroy

D. processAction

Correct Answer: D

processAction, to handle action requests doView, to handle render requests when in VIEW mode doEdit, to handle render requests when in EDIT mode doHelp, to handle render request when in HELP mode init and destroy, to manage resources that are held for the life of the servlet

QUESTION 3

Which statement is true regarding JSR 286 event support in IBM WebSphere Portal?

A. Events can be wired to IBM API cooperative portlets.

B. Events can be wired to JSR 168 cooperative portlets.

C. Events cannot be used in tandem with public render parameters.

D. When the "Global" check box is set on the wires page. JSR 286 event processing is automatic; wires are not needed and. therefore, are ignored.

Correct Answer: B

nteroperability between JSR 286 portlet events and JSR 168 cooperative portlets By concept, cooperative portlets are

similar to JSR 286 portlet events. Both concepts describe publish/subscribe communication patterns that are based on typed information that is published and received by portlets and propagated via communication links.

Because the concepts are quite similar, the portal supports data exchange between JSR 168 cooperative portlets and JSR 286 portlets that support events. This means that you can extend an existing setup using JSR 168 cooperative portlets with new JSR 286 portlets and that you can smoothly migrate individual cooperative portlets to the new API without losing communication possibilities.

QUESTION 4

Which folders are two of the root folders in the fs-type1 WebDAV entry point? (Choose two.)

A. skins

B. layout

C. resources

D. layout-templates

E. theme-templates

Correct Answer: AD

older structure and reserved folder names The fs-type1 WebDAV entry points provide the following set of predefined root folders used by themes: themes skins layout-templates common-resources iwidgets

QUESTION 5
