QUESTION 5

Ella developed a custom application object to extend the Personalization engine with a custom user attribute. The custom class was packaged into a JAR file archive and placed on the server. Then, the portal was restarted. What must Ella do before she can create a business rule using the new user attribute?

- A. Add the attribute directly to the page.
- B. Add a Resource Collection to the Personalization engine.
- C. Add the Application Object to the Personalization engine.
- D. "Show Rule Mappings" needs to be enabled on the portlet.

Correct Answer: C

An application object is a java object existing at a known location in the request context. Defining an application object involves specifying the object's class name (as a Java™ class), and specifying a key (string key into a session attribute) to find it in the request context. Personalization
