-  **800,000+** Satisfied Customers

QUESTION 1

In an out-of-the-box implementation of IBM Sterling Selling and Fulfillment Suite, the Application and Agent Servers are running on an AIX Server. Which startup script should be used to start agent servers?

- A. \$INSTALL_DIR/bin/agentserver.sh
- B. \$INSTALL_DIR/bin/triggeragent.sh
- C. \$INSTALL_DIR/bin/startagentserver.sh
- D. \$INSTALL_DIR/bin/startdefaultagent.sh

Correct Answer: A

QUESTION 2

A service provider offers installation and haul away services for appliances and furniture. The services are offered by two teams, each specializing in either appliances or furniture. On receiving a request for a service, the service provider would like to use the closest team to the customer that also has the relevant skills. How can this requirement be achieved?

- A. The ship node servicing the customer's shipping address should be stamped as the "ServiceNode" on the service order line.
- B. The installation and haul away items should be modeled as service items in the catalog and Sourcing rules for provided services should be configured.
- C. The installation and haul away should be modeled as accessories to the main product (appliance and furniture) so the sourcing rules for the product will also look for capacity for the accessories.
- D. The service items should be defined in the catalog along with their association with the main product (appliance and furniture). The sourcing rules for the product item will then automatically identify the right ship node that can offer the service.

Correct Answer: B

QUESTION 3

What must be done for IBM Sterling Selling and Fulfillment Suite to allow an administrator to specify a different set of properties for each process that is executed?

- A. Have a different sandbox.cfg file for each process that is executed.
- B. Have a different servers.properties and customer_overrides.properties file for each process that is executed.
- C. Have the same servers.properties file but a different customer_overrides.properties file for each process that is

executed.

D. Have a different servers.properties file for each process that is executed. The customer_overrides.properties file does not affect this configuration.

Correct Answer: B

QUESTION 4

Due to an enterprise-wide license agreement, a company uses a database from a particular vendor. The database to be used for development is supported per the System_Requirements_Guide.pdf. The testing, staging, and production deployments are however going to use a different database (from a different vendor), which is also a supported database.

Which statement is true about this situation?

A. The IBM Sterling Selling and Fulfillment Suite allows for the databases to be different between development, testing, staging and production deployments.

B. Since the IBM Sterling Selling and Fulfillment Suite uses standard JDBC to connect to the database, questions around compatibility of databases must be directed to the database vendors.

C. Even though it might work, the IBM Sterling Selling and Fulfillment Suite deployment will be supported by IBM only if the database used for production remains the same as the one used for development.

D. The IBM Sterling Selling and Fulfillment Suite deployment contains code that is database specific; therefore, it is not advisable to use different database providers between development and production environments.

Correct Answer: A

QUESTION 5

A Resource pool defines two slots, 9-12 and 1-5, and the available capacity is four hours in each slot. The following capacity reservations are to be made:

Res1 - Slot : 9-12, Qty : 3
Res2 - Slot : 1-4, Qty : 1
Res3 - Slot : 12-6, Qty : 1
Res4 - Slot : 1-5, Qty : 7

In IBM Sterling Selling and Fulfillment Suite, which capacity reservations will be created?

A. Res1

B. Res2

C. Res3

D. Res4

Correct Answer: A
