QUESTION 1

To allow existing AS2 communications to complete, which Drain Queues option must be selected when gracefully stopping an IBM Sterling B2B Integrator (SBI) system in a controlled manner?

- A. Drain No BPs
- B. Drain ALL BPs
- C. Drain Not Started BPs
- D. Drain Not Started BPs and No Open Session BPs

Correct Answer: D

QUESTION 2

A customer has deployed a two node active-active IBM Sterling B2B Integrator (SBI) cluster in the secure zone on two servers. The customer has installed two servers in the DMZ for the purpose of installing remote SBI Perimeter Servers to facilitate communications with external partners. Each server in the DMZ is multi-homed (two external facing NIC cards with two external IP addresses and one internal facing NIC card) to two different external facing network segments for redundancy in case one network segment fails or a NIC card fails. External partners will connect to an external IP Load Balancer that will distribute inbound FTP/S, SFTP and HTTP Client sessions across the Perimeter Servers. The Perimeter Servers will be installed without using wildcard addresses. The customer requirement is that if any single server fails and one of the two external facing network segments fail, all the other SBI nodes and remote Perimeter Server instances must continue to actively handle inbound sessions for each protocol. What is the minimum number of remote Perimeter Server instances that must be deployed in the DMZ?

- A. 4
- B. 6
- C. 8
- D. 12

Correct Answer: C

QUESTION 3

A company allows HTTP communication from trading partners. What must be configured on the HTTP Server adapter to allow a Business Process (BP) to be invoked to handle incoming HTTP requests?

- A. URI
- B. WAR file
- C. Input schema
- D. CA Certificate

Correct Answer: A

QUESTION 4

Which two items can help reduce the size of process data and increase performance? (Choose two.)

- A. Purge Service
- B. Release Service
- C. message_to_child
- D. JVM Max Heap size
- E. Compression Service

Correct Answer: BC

QUESTION 5

A company has implemented a Web Service (WS) in IBM Sterling B2B Integrator (SBI). The WS is using unencrypted HTTP as transport. The SBI is deployed as a single node instance. How can this transport be configured to be encrypted?

- A. Change the URL in the WSDL file to https://...
- B. Change the transport to HTTPS in WS manager.
- C. Change the SSL settings in SOAHttpServerAdapter.
- D. Check in a SSL certificate and link to it in WS manager.

Correct Answer: B
