QUESTION 1

Refer to the image shown here:

A large corporation manufactures beds in different colors. The inventory file consists of three record types, a header, a detail, and bed color. The record type is the first byte of each record (H=Header, D=Detail, C=Color). If there is an error in one of the bed color records, all of the color records under that detail record should be ignored. How can an application developer specify that all color records should be ignored if one is found to be invalid?

A. Use the restart function in the map.

B. Use the restart attribute on the color record.

C. Use the restart attribute on the detail record.

D. Use the restart attribute on the header record.

Correct Answer: C

QUESTION 2

Out of all the available settings for the location of the workspace, which of the following is the MOST OPTIMAL setting for performance when processing small transactions such as MQ messages?

A. Workspace = File

B. Workspace = Page

C. Workspace = Burst

D. Workspace = Memory

Correct Answer: D

QUESTION 3

Which two of the following statements about the REJECT function are TRUE? The REJECT function:

A. can be used in a map rule.

B. can be used in a component rule.

C. returns a text string of up to 500 bytes.

D. operates on invalid data objects contained within valid objects.

Correct Answer: AD

QUESTION 4

Refer to the image shown here:

```
Function summary
Function          Iterations          Time
------------------------------------------------
VALIDATE_CARD          2               148
BUILD_CARD             2               216
TYPE_NAME            165                73
FLOAT_CONSTANT         9                 1
MULT_OP                8                 9
NONE                   8                 0
GETFILENAME            1                 0
COUNT                  1                 2
CURRENTDATE            9                 6
CURRENTTIME            1                 0
EXTRACT                8                22
LOOKUP                 8                28
ROUND                  8                14
SUM                    1                 5
MAP_NAME               8               162
TEXTTONUMBER           8                 6
ADDDAYS                1                 1
EITHER                 8
```

Which map rule function takes the MOST time to run?

A. LOOKUP

B. MAP_NAME

C. TYPE_NAME

D. BUILD_CARD

Correct Answer: A

QUESTION 5
