QUESTION 1

The Administrator would like to create a new object store. What other tool can be used instead of IBM FileNet Enterprise Manager (FEM)?

A. FileNet Configuration Manager (FCM)

B. Web-based FileNet Enterprise Manager (WFEM)

C. There are no other tools available to perform this specific task.

D. Web-based IBM Administrative Console for Content Engine (ACCE)

Correct Answer: D

QUESTION 2

A consultant is working with a customer to perform an upgrade from IBM FileNet P8 V3.5.2 to P8 V5.1 in a distributed environment using IBM WebSphere Application Server Network Deployment (WAS ND) with a load balancer for http protocol for both the Content Engine (CE) and Application Engine (AE). When attempting to run the command-line CE Upgrader from the first node of the CE cluster, the /ContentEngine/tools/upgrade directory is not found. What is the most likely issue?

A. This is a known issue with the CE installer: use the Web Upgrade Tool.

B. When the CE was installed, only the Web Upgrade Tool was installed by default.

C. When the CE was deployed in the WAS ND environment, it was installed on the Deployment Manager node.

D. When the CE was deployed in the WAS ND environment, the command-line CE Upgrader did not deploy properly to the node.

Correct Answer: C

QUESTION 3

A security administrator is preparing to create a UNIX operating system account to run the IBM FileNet P8 Configuration Manager tool. This user must have execute and read/write permissions to the configuration directory. What other minimum requirements must this user have?

A. User must belong to the local administrative group.

B. User must belong to the ae_appserver_install_group.

C. User must belong to the ce_appserver_install_group.

D. User must belong to the pe_appserveer_install_group.

Correct Answer: C

QUESTION 4

The IBM FileNet Process Engine software has been installed on a Linux server using a non-root operating system user and using the default storage locations. What additional manual step must be taken to ensure that the Process Engine manager process is started automatically following a reboot?

A. Using a user with appropriate permissions edit the /etc/inittab file and add the following line:PEMR:2345:wait:/opt/IBM/FileNet/ProcessEngine/runstartpemgr

B. Using a user with appropriate permissions edit the /etc/inittab file and add the following line:PEMR:2345:wait:/opt/IBM/FileNet/ProcessEngine/bin/pemgrstart

C. Using a user with appropriate permissions edit the /etc/initlog.conf file and add the following line:PEMR:2345:wait:/opt/IBM/FileNet/ProcessEngine/bin/runpemgr

D. Using a user with appropriate permissions edit the /etc/initlog.conf file and add the following line:PEMR:2345:wait:/opt/IBM/FileNet/ProcessEngine/startpesvr

Correct Answer: A

QUESTION 5

A consultant has installed an IBM FileNet Process Engine client fix pack on a 3 node, horizontally load balanced Application Engine installation. After an interactive installation, some users are seeing the same problem intermittently, rather than constantly, as it was before the fix pack was installed. What could still be the issue?

A. The fix pack did not correct the problem.

B. The fix pack install script did not deploy the war file properly.

C. The fix pack installer did not delete an application server temp directory.

D. The fix pack install script did not delete an Application Server temp directory.

Correct Answer: C
