QUESTION 1

How are complex data flows requiring complex data structures between backend systems integrated into IBM Case Manager?

- A. You can define complex business objects in Case Builder to provide complex data flows between web services within any process fragment
- B. Complex interactions between Service Oriented Architecture (SOA) components are modeled in WebSphere Integration Developer and then mapped to a task in an IBM Case Manager solution
- C. Case Builder and the P8 Process Designer support round tripping in order to define how Tasks map to SOA services by using industry standard Service Component Architecture (SCA) bindings
- D. The P8 Process Designer has been enhanced to provide complex data mediation and business object mapping capabilities when orchestrating transactions amongst backend systems via web services

Correct Answer: B

QUESTION 2

Which statement is correct when describing the relationship between steps and roles vs. steps and workgroups?

- A. Any member of a role can perform the work at any task step assigned to the role
- B. The users or groups in the workgroup are defined at design time in the IBM Case Builder
- C. If more than one user is assigned to a workgroup only one user needs to complete the step
- D. Steps in a role lane must be performed by every user assigned to the role before step completion

Correct Answer: A

QUESTION 3

What Content Management Interoperability Services (CMIS) extensions allow solutions to use additional P8 content capabilities?

- A. Hidden properties, text search, GZIP
- B. Hidden properties, text search, rendition
- C. Domain name, Records Management, file object
- D. Text search, Records Management, Policy Services

Correct Answer: A

QUESTION 4

How can you model the directing of work to case workers? (Choose two)

- A. You associate roles with steps in the Step Editor
- B. You associate roles with Case Tasks in Case Builder
- C. You specify workgroups as a property of a Case Task
- D. You associate workgroups with steps in the Step Editor
- E. You can assign a specific user to a step in the Step Editor

Correct Answer: AD

QUESTION 5

What tool is used to export Mashup pages from the Mashup server to the content engine in preparation for solution deployment to a production environment?

- A. Case Builder
- B. FileNet Deployment Manager
- C. Mashup Center Space Manager
- D. Case Manager Administration Client

Correct Answer: D
