**QUESTION 1**

A system specialist is using Configuration Manager to configure and deploy the Content Platform Engine on an IBM WebSphere Application Server (WAS). There is an error during the creation of the GCD data sources that states "No jar or zip files found in /sqljdbc.jar".

Which two of the following actions can be used to find the causes of the error?

- A. Check the configuration of the GCD database.
- B. Execute the database script xa\_install.sql on the SQL Server.
- C. Check that the database driver is present in the correct folder.
- D. Verify the WAS environment variable is set correctly for the database server.
- E. Copy the sqljdbc\_xa.dll from the JDBC installation directory to the binn folder of the database instance.

Correct Answer: BC

---

**QUESTION 2**

An IBM Content Platform Engine V5.2.1 (CPE) administrator receives a call from a user that the system is running slow during certain times of the day.

What logging or configuration change in CPE, on a WebSphere Application Server (WAS), will help gather information for this issue?

- A. In FileNet Enterprise Manager under the Domain Properties>Trace Control tab check the Enabled Trace Logging box.
- B. For CPE installed on a WAS, modify the fnlog4j.properties.sample and place it in WebSphere\AppServer\java\jre\lib.
- C. In Administration Console for Content Platform Engine under the Domain Properties>Trace Subsystem check the Enabled Trace Logging box.
- D. For CPE installed on WebSphere, edit the perflog\_config.properties file under WebSphere\AppServer\profiles\profile\_name\FileNet\server\_instance\_name.

Correct Answer: B

---

**QUESTION 3**

A consultant for an aircraft engine manufacture is migrating their IBM Case Foundation system to a new set of hardware in order to handle an increased load in engineering drawings and their associated approval processes. Company policy does not allow the use of a graphical interface for application installations on their AIX servers.

When the installation completes, what file should the consultant check for errors?

- A. user\_home/ce\_install\_log\_5.2.1.txt

- B. os\_temp\_path/ce\_install\_log\_5.2.1.txt
- C. ce\_install\_path/ce\_install\_log\_5.2.1.txt
- D. os\_temp\_path/ce\_logs/ce\_install\_log\_5.2.1.txt

Correct Answer: B

---

#### QUESTION 4

A company performed an upgrade of multiple components and are not sure if they updated the Content Platform Engine (CPE) Client files on the Workplace XT (WPXT) server.

How can it be determined if the CPE Client files on WPXT match the CPE Version?

- A. View the CE Ping page which shows the CE version and the WPXT CPE Client file version.
- B. Open WPXT and go to help about and obtain the dap number and match it to the dap number on the CE Ping page.
- C. Open the jace.jar files on WPXT and verify the dap number in the manifest.mf file matches the dap number on the CE Ping page.
- D.

Correct Answer: A

---

#### QUESTION 5

A company has two sites in an IBM FileNet P8 domain: site A and site B. Both sites have one or more FileNet Content Engine servers separated by a WAN with users in both sites. A storage area is created at site A so that content can be stored permanently at site A.

Users in site B retrieve the content from the site A storage area. Each time they access a document, however, the performance is not acceptable.

Which of the following will have the most impact in increasing performance for users at site B when accessing documents from the storage area at site A?

- A. Enable Content Encryption.
- B. Suppress Duplicate Content.
- C. Enable Content Compression.
- D. Create a Content Cache Area.

Correct Answer: C
