QUESTION 1

Which of the following is not an ODBC connector property?

- A. Username
- B. Password
- C. Data source
- D. Remote server

Correct Answer: D

QUESTION 2

Which three statements are true about stage variables? (Select three)

- A. Stage variables cannot contain NULL values.
- B. Stage variables are executed before loop variables.
- C. Stage variables retain their values between rows in the stage.
- D. Stage variables are executed after constraints but before derivations.
- E. A derivation for a stage variable can reference stage variables that are later in the execution order.

Correct Answer: ACE

QUESTION 3

Using a DB2 for z/OS source database, a 200 million row source table with 30 million distinct values must be aggregated to calculate the average value of two column attributes. What would provide optimal performance while satisfying the business requirements?

- A. Select all source rows using a DB2 API stage. Aggregate using a Sort Aggregator.
- B. Using custom SQL with AVG functions and a DISTINCT clause,select all source rows using a DB2 Enterprise stage.
- C. Using custom SQL with an ORDER BY clause based on key columns,select all source rows using the DB2 API stage. Aggregate using a Hash Aggregator.
- D. Select all source rows using a DB2 Enterprise stage,use a parallel Sort stage with the specified sort keys,calculate the average values using a parallel Transformer with stage variables and output link constraints.

Correct Answer: A

QUESTION 4

Which three statements are true about stage variables in a Transformer Stage? (Choose three.)

- A. Stage variables can be set to NULL.
- B. Varchar stage variables can be initialized with spaces.
- C. Stage variables are refreshed with default values before each new input row is processed.
- D. The expression executed for a stage variable can refer to a stage variable which is executed later.
- E. A stage variable in one Transformer can refer to a stage variable in another Transformer, as long as the second Transformer was processed earlier in the job flow.

Correct Answer: ABD

QUESTION 5

Which two statements about annotations are correct? (Select two)

- A. An annotation can be drawn around one or more stages.
- B. The Full job description field is only visible within the Designer Client.
- C. The Short job description field displays on log summary lines within Director client.
- D. The Short job description field will appear in job log when \$APT_PM_SHOW_PIDS is set.

Correct Answer: AD
