QUESTION 1

Using Optimistic Locking, both Transaction1 and Transaction 2 have read the same row including the RID_BIT and ROW CHANGE TOKEN values. Transaction 1 updates the row after ensuring that the row has not changed after the previous SELECT by adding a RID_BIT and ROW CHANGE TOKEN predicate to the UPDATE statement. Transaction 2 now tries to update that same row using the same predicate as transaction 1.

What will be the result?

A. The row will be found with the same ROW CHANGE TOKEN. Transaction 2 will now insert its values replacing those of transaction 1.

B. The row will be found with a different ROW CHANGE TOKEN and Transaction 2 will overwrite the values set in transaction 1.

C. The row will not be found because the value of the ROW CHANGE TOKEN has changed in regard to the UPDATE of transaction 1. Transaction 2 has to retry in order to retrieve the current data.

D. The row will not be found because the value of the ROW CHANGE TOKEN has changed in regard to the UPDATE of transaction 1. Transaction 2 will complete with an insert of a new row.

Correct Answer: C

QUESTION 2

Which two statements are true? (Choose two.)

A. SQL procedures can contain static and/or dynamic SQL statements.

B. Static or dynamic SQL execution is not associated with a package.

C. The SQL procedure isalways associated with a package that contains access paths of SQL statements in the procedure.

D. It is necessary for an end-user to have object level privileges if that user has execute privileges on an associated package and the SQL procedure.

E. SQL procedures can have COMMIT or ROLLBACK within atomic compound statements.

Correct Answer: AC

QUESTION 3

Which statement is true about the data types VARCHAR and VARCHAR2?

A. The VARCHAR data type cannot be used with a database thathas been created in Oracle compatibility mode.

B. The VARCHAR2 data type treats empty strings as null; the VARCHAR data type treats empty strings as not null with zero length.

C. The VARCHAR2 data type length is limited to 2000 bytes; the VARCHAR data type length can be up to 32K.

D. The VARCHAR2 data type cannot be used in a database that has not been created in Oracle compatibility mode.

Correct Answer: B

QUESTION 4

Which tool can be used to get quick static SQL Explain data from packages?

A. db2expln

B. db2exfmt

C. Control Center

D. DB2 command center

Correct Answer: A

QUESTION 5

Which statement will create global variable?

A. CREATE VARIABLE glob_emp_sal ANCHORE TO employee.salary

B. PUBLISH VARIABLE glob_emp_sal DECIMAL(9,2)

C. DECLARE GLOBAL VARIABLE glob_emp_sal DECIMAL(9,2)

D. DECLARE GLOBAL VARIABLE glob_emp_sal ANCHORE TO employee.salary

Correct Answer: A
